## Model

CPM1A-MAD01 ANALOG INPUT/OUTPUT UNIT INSTRUCTION SHEET

Thank you for purchasing an OMRON product. Read this thoroughly and familiarize yourself with the functions and characteristics of the product before using it. Keep this instruction sheet for future reference.

## \# Terminals for external wiring

| Number of analog outputs | 1 |  |
| :---: | :---: | :---: |
| Output signal range | Voltage output | $\begin{array}{r} 0 \mathrm{~V} \text { to }+10 \mathrm{~V} \\ -10 \mathrm{~V} \text { to }+10 \mathrm{~V} \end{array}$ |
|  | Current output | 4 mA to 20mA |
| Resolution | Voltage output | $\begin{array}{\|l\|} \hline 1 / 256(0 \mathrm{~V} \text { to }+10 \mathrm{~V}) \\ 1 / 512(-10 \mathrm{~V} \text { to }+10 \mathrm{~V}) \\ \hline \end{array}$ |
|  | Current output | 1/256 |
| Accuracy | Voltage output | 1.0\% max. (full scale) |
|  | Current output | 1.0\% max. (full scale) |
| Number of analog inputs | 2 |  |
| Input signal range | Voltage input | $\begin{aligned} & 0 \mathrm{~V} \text { to }+10 \mathrm{~V} \\ & +1 \mathrm{~V} \text { to }+5 \mathrm{~V} \end{aligned}$ |
|  | Current input | 4 mA to 20 mA |
| Resolution | Voltage input | 1/256 |
|  | Current input | 1/256 |
| Accuracy | Voltage input | 1.0\% max. (full scale) |
|  | Current input | 1.0\% max (full scale) |
| Max. Input signals | Voltage input | $\pm 15 \mathrm{~V}$ continuous |
|  | Current input | 30mA continuous |
| Conversion time (See Note.) | 10ms. max. / Unit |  |
| Max. output current | Voltage output | 5 mA |
| Max. load resistance | Current output | $350 \Omega$ |
| Max. total output current (Unit) | 21 mA |  |
| PC signal | Voltage output | 8-bit binary + sign bit (80FF to 0000 to 00FF hexadecimal) |
|  | Current output | 8 -bit binary ( 0000 to 00FF hexadecimal) |
| External connections | 9-pin terminal block (non-removable) |  |
| Insulation | Between output/input terminals and PC : photocouplers |  |
|  | Between output terminals individual : none |  |
| Power consumption | $\begin{array}{\|l\|} \hline \text { 60mA max. (5VDC) } \\ 60 \mathrm{~mA} \max .(24 \mathrm{VDC}) \\ \hline \end{array}$ |  |
| Dimensions | $66(\mathrm{~W}) \times 50(\mathrm{H}) \times 90$ (D) mm |  |
| Weight | 150 gram max. |  |
| Note This is th outputs of | time for a comp the unit. | ete refresh of inputs and |

[^0]
## \# Setting the ranges

After starting up, you have to set the ranges.
These ranges can be set by writing FF0x to the output channel of the CPM1A-MAD01 (see table below).

| Range <br> set <br> code | OUTPUT | INPUT 1 | INPUT 2 |
| :---: | :---: | :---: | :---: |
| FF00 | 0 to 10 V <br> 4 to 20 mA | 0 to 10 V | 0 to 10 V |
| FF01 | -10 to 10 V <br> 4 to 20 mA | 0 to 10 V | 0 to 10 V |
| FF02 | 0 to 10 V <br> 4 to 20 mA | 1 to 5 V <br> 4 to 20 mA | 0 to 10 V |
| FF03 | -10 to 10 V <br> 4 to 20 mA | 1 to 5 V <br> 4 to 20 mA | 0 to 10 V |
| FF04 | 0 to 10 V <br> 4 to 20 mA | 0 to 10 V | 1 to 5 V |
| FF05 | -10 to 10 V <br> 4 to 20 mA | 0 to 10 V | 1 to 5 V |
| FF06 | 0 to 10 V <br> 4 to 20 mA | 1 to 5 V <br> 4 to 20 mA | 1 to 5 V <br> 4 to 20 mA |
| FF07 | -10 to 10 V <br> 4 to 20 mA | 1 to 5 V <br> 4 | 1 to 5 V <br> 4 to 20 mA |

NOTE Always start with setting the ranges after power up otherwise the CPM1A-MAD01 will not convert any input or output.

## \# Channel allocation:

| CPU | Output channel <br> MAD01 | Input channel 1 <br> MAD01 | Input channel 2 <br> MAD01 |
| :---: | :---: | :---: | :---: |
| 10CDR | 11 | 1 | 2 |
| 20CDR | 11 | 1 | 2 |
| 30CDR | 12 | 2 | 3 |

## \# IR bit allocation:

1. The sign bit is only valid when the range is set to -10 V to +10 V .
2. Broken wire bit will be set in the $1-5 \mathrm{~V} / 4-20 \mathrm{~mA}$ input range when the input voltage/current is below $1 \mathrm{~V} / 4 \mathrm{~mA}$.

## \# Output wiring:

\# Input wiring:

\#Data
Output

## \# Dimensions

[^0]:    - Voltage output and current output can be used simultaneously as long as the total output current is 21 mA or less.
    - Data written to the output channel is valid for current and voltage output.
    - Data read from the input channels is valid for current or voltage input.
