

Two-circuit Limit Switch WL

Wide Selection of Two-circuit Limit Switches

- A wide selection of models are available, including the overtravel models with greater OT, lamp-equipped models for checking operation, low-temperature and heat-resistant models, and microload models.
- Microload models are added to the product lineup.
- Meets EN/IEC standards (only Switches with ground terminals).
- Switches with ground terminals have the CE marking.

3. Environment-resistant Model Specifications

| | |
|--------|---------------------------------|
| Blank: | Standard |
| RP: | Corrosion-proof (See note 1.) |
| P1: | Weather-resistant (See note 1.) |

4. Built-in Switch Specifications

| | |
|--------|---|
| Blank: | General-purpose built-in switch |
| 55: | Hermetically-sealed built-in switch (See note 1.) |

5. Temperature Specifications

| | |
|--------|--|
| Blank: | Standard: -10°C to 80°C |
| TH: | Heat-resistive: 5°C to 120°C (See note 1.) |
| TC: | Low temperature: -40°C to 40°C (See note 1.) |

6. Special Hermetic Model Specifications

| | |
|--------|---|
| Blank: | No cables or molding |
| 139: | General-purpose built-in switch with cables attached and molded conduit opening and cover (cover cannot be removed). (See note 1.) |
| 140: | Airtight built-in switch with cables attached and molded conduit opening, cover, and case cover (cover cannot be removed). (See note 1.) |
| 141: | Airtight built-in switch with cables attached and molded conduit opening, cover, and case cover (cover cannot be removed). The Head opening is created to protect it from cutting powder. (See note 1.) |
| 145: | Airtight built-in switch with cables attached and molded conduit opening, cover, and case cover (cover cannot be removed, Head can be mounted in any of 4 directions). The Head opening is created to protect it from cutting powder. (See note 1.) |
| RP40: | Airtight built-in switch with cables attached, SC Connector can be used, molded conduit opening, cover, and case cover (cover cannot be removed, Head direction can be changed). (See note 1.) |
| RP60: | Airtight built-in switch with cables attached, fluorine rubber-molded conduit opening, cover, and case cover (cover cannot be removed, Head direction cannot be changed). (See note 1.) |

7. Conduit Size, Ground Terminal Specifications (See note 2.)

| | | |
|--------|-----------|-------------------------|
| Blank: | G 1/2 | Without ground terminal |
| G1: | G 1/2 | With ground terminal |
| G: | Pg13.5 | With ground terminal |
| Y: | M20 | With ground terminal |
| TS: | 1/2-14NPT | With ground terminal |

8. Indicator Type

| | Element | Voltage | Leakage Current |
|-----|-----------|--------------------|----------------------------------|
| LE: | Neon lamp | 125 VAC 250 VAC | Approx. 0.6 mA Approx. 1.9 mA |
| LD: | LED | 10 to 115 VAC/VDC | Approx. 0.5 mA |

9. Lamp Wiring

| | |
|----|--|
| 2: | NC connection: Light-ON when operating |
| 3: | NO connection: Light-ON when not operating |

10. Lever Type

| | |
|--------|------------------|
| Blank: | Standard lever |
| A: | Double nut lever |

- Note:** 1. For information on applicable models, see page 60.
 2. Switches with ground terminals meet EN/IEC standards (and have the CE marking).

Ordering Information

Classification

| Specifications | | Standard | Overtravel | High-precision | Features | Page | |
|--|---------------|----------------------|---|---|--|--------------------------|---|
| Actuators | Roller lever | Yes | Yes | Yes | Five models: Roller lever, adjustable roller lever, adjustable rod lever, fork lever lock, rod spring lever. | 77 to 94 | |
| | Plunger | Yes | --- | --- | Six models: Top plunger, top-roller plunger, top-ball plunger, horizontal plunger, horizontal-roller plunger, horizontal-ball plunger. | 62 to 64 69, 73 to 75 | |
| | Flexible rod | Yes | --- | --- | Two models: coil spring and steel wire. | | |
| Load/contact | Standard load | SPST-NO/SPST-NC type | Yes | | Standard models use a two-circuit double-break switch. | | |
| | Microload | SPST-NO/SPST-NC type | Yes | | Specifications include gold-plated contacts. | | |
| Environment-resistant models (See note 3.) | Airtight-seal | WL□-55 | Yes (Cannot be used with heat-resistive and low-temperature models.) | | Uses an airtight-sealed built-in switch. | 66, 76 | |
| | Hermetic seal | Molded terminals | | WL□-139 | | | Lead wires are attached. The case cover and conduit section are molded from epoxy resin to improve sealing performance. |
| | | | | WL□-140 WL□-141 WL□-145 | | | Lead wires are attached. The case is filled with epoxy resin, to ensure high sealing performance. The Head opening is protected from cutting powder. (WL□-141 and -145 models) Only WLG2, WLCA2, and WLGA2 can be fabricated. (WL□-141 models.) |
| | | | | | | | |
| | Anti-coolant | WL□-RP40 | | | The connector can be removed, so it is possible to use flexible wires in the cable. The Head can be removed. | | |
| WL□-RP60 | | | Rubber parts are made from fluorine rubber. The Head cannot be removed. | | | | |
| Spatter-prevention | WL□-S | Yes | | To improve spatter prevention during welding, a heat-resistant resin is used, and screws and rollers are all made from stainless steel. | 67, 69, 71, 73, 76, 89 | | |

| Specifications | | Standard | Overtravel | High-precision | Features | Page |
|--|-------------------------------|----------------|--|-------------------|--|--------------------|
| Environment-resistant models (See note 3.) | Heat-resistive | WL□-TH | Yes (Cannot be used with airtight, hermetic, low-temperature, corrosion-proof, or lamp-equipped models.) | | To improve heat resistance, silicone rubber is used for rubber parts and for the built-in switch. The operating temperature range is +5°C to 120°C. | 66 |
| | Low-temperature | WL□-TC | Yes (Cannot be used with airtight, hermetic, heat-resistive, corrosion-proof, or lamp-equipped models.) | | To improve low temperature resistance, silicone rubber is used. The operating temperature range is -40°C to 40°C. | |
| | Corrosion-proof (See note 4.) | WL□-RP | Yes (Cannot be used with lamp-equipped models.) | | Diecast parts such as the switch box are made of corrosion-proof aluminum. Rubber-sealing parts are made of fluorine rubber and exposed nuts and screws are made of stainless steel. These all aid in resisting oil, chemicals and adverse weather conditions. | |
| | Outdoor specifications | WL□-P1 | --- (See note 5.) | Yes (See note 6.) | --- | |
| Lamp-equipped | WL□-LE | Yes | | | Operating status can be checked at a glance. Lit when operating and not lit when not operating. WL□-LE: 100 VAC/VDC min. WL□-LD: 115 VAC/VDC min. (Refer to page 71 for detailed ratings.) | 64, 72, 73, 75, 86 |
| | WL□-LD | Yes | | | | |
| Relevant pages | | Pages 77 to 94 | | | --- | --- |

- Note:**
- Do not expose to extreme changes in temperature.
 - Standard Models: Operate on each side at an angle of 45°. Possible to set to one-side operation on either side. Pretravel (PT) is 15°.
Overtravel Models: Standard and high-sensitivity models operate on each side at an angle of 80°. Not possible to set to one-side operation. -2N Series operate on each side at an angle of 90°. Possible to set to one-side operation on either side.
High-precision Models: Operate on each side at an angle of 45°. Possible to set to one-side operation on either side. Pretravel (PT) is 5°.
 - When ordering, add the suffix for the environment-resistant model or indicator specifications required according to the operating environment and purpose.
 - The overtravel model (-2N Series), fork lever lock model (WLCA32-41 to 44), horizontal plunger (WLS□) model, heat-resistive model, low-temperature model, and lamp-equipped model cannot be used with the corrosion-proof model.
 - Outdoor specifications are available for some standard models. Consult your OMRON representative for details.
 - Outdoor specifications are only available for general models and high-sensitivity models.

■ List of Models

General-purpose Models

These Limit Switches are two-circuit double-break switches housed in rugged diecast, thus making it an oil-tight, waterproof and dustproof construction (complies with IP67).

In addition to the standard models, microload models are also available.

A wide range of actuators with a range of functions are available; rotating lever, plunger, flexible rod etc.

The rubber material in the standard models is designed to be resistant to water and most oils.

Roller Lever Models: Short, Medium, and Long Lever Models

| Type | Total travel (TT) | Features | Actuator (See note 2.) | | |
|----------------|---|--|---|--|--|
| | | | WL-1A100 Roller Lever: Short lever (R38) | WL-1A200 Roller Lever: Medium lever (R50) | WL-1A300 Roller Lever: Long lever (R63) |
| Standard |  | One-side operation is possible. (See note 3.) Head can be mounted in any of the four directions. | WLCA2  | WLCA2-7  | WLCA2-8  |
| Over-travel | General |  | One-side operation is impossible. (See note 3.) Head can be mounted in any of the four directions. | WLH2 | --- |
| | High-sensitivity | 80° | One-side operation is possible. (See note 3.) Head can be mounted in any of the four directions. | WLG2 | --- |
| | Side-installation |  | 90° One-side operation is possible. (See note 3.) Head can be mounted in any of the two directions. (When the Head can be mounted horizontally, the Head can be mounted in any of the four directions.) | WLCA2-2N | --- |
| High-precision |  | 45° One-side operation is possible. (See note 3.) Head can be mounted in any of the four directions. | WLGCA2 | --- | --- |

Note: 1. For the approved standards file numbers, refer to page 69.

2. For external dimensions and other information, refer to pages 77 to 94.

3. One-side operation means that three operational directions can be selected electrically, according to the change in direction of the operating plunger. Those models for which one-side operation is impossible can only operate on both sides. For details, see page 94.

Adjustable Roller Levers and Adjustable Rod Levers

| Type | Total Travel (TT) | Features | Actuator (See note 2.) | |
|------------|--|--|---|---|
| | | | WL-2A100 Adjustable Roller Lever  | WL-4A100 Adjustable Rod Lever (Adjustable length: 25 to 140 mm) WL-3A100 (Adjustable length: 350 to 380 mm)  |
| Standard |  | One-side operation possible. (See note 3.) Head can be mounted in any of the four directions. | WLCA12 | --- |
| | | | --- | WLCL (WL-4A100) |
| Overtravel | General  | One-side operation possible. (See note 3.) Head can be mounted in any of the four directions. | WLH12 | WLHL (WL-4A100) WLHAL4 (WL-3A100) |
| | | | High-sensitivity | WLG12 |
| | Side-installation |  | One-side operation is possible. (See note 3.) Head can be mounted in any of the two directions. (When the Head can be mounted horizontally, the Head can be mounted in any of the four directions.) | WLCA12-2N |

Note: 1. For the approved standards file numbers, refer to page 69.

2. For external dimensions and other information, refer to pages 77 to 94.

3. One-side operation means that three operational directions can be selected electrically, according to the change in direction of the operating plunger. The operating plunger is set for operation on both sides before delivery. Those models for which one-side operation is impossible can only operate on both sides. For details, see page 94. The operational plunger is factory-set to both sides.

Rod Spring Levers and Fork Lever Locks

| Type | Total travel (TT) | Features | Actuator (See note 2.) | |
|------------|--|---|--|--|
| | | | WL-3A200 Rod Spring Lever  | Fork Lever Locks: WL-5A100, WL-5A102, WL-5A104  |
| Protective |  | Head can be mounted in any of the four directions. | --- | WLCA32-41 (WL-5A100) WLCA32-42 (WL-5A102) WLCA32-43 (WL-5A104) |
| Overtravel | General  | One-side operation is possible. (See note 3.) Head can be mounted in any of the four directions. | WLHAL5 | --- |

Note: 1. For the approved standard file numbers, refer to page 69.

2. For external dimensions and other information, refer to pages 77 to 94.

3. One-side operation means that three operational directions can be selected electrically, according to the change in direction of the operating plunger. The operating plunger is set for operation on both sides before delivery. Those models for which one-side operation is impossible can only operate on both sides. For details, see page 94. The operational plunger is factory-set to both sides.

4. The fork lever lock is configured so that the dog pushes the lever to reverse the output and this reversed state is maintained even after the dog continues on. If the dog then pushes the lever from the opposite direction, the lever will return to its original position.

Standard Plungers

| Type | Actuators | Model |
|------------|---|---------------------------|
| Top | Top Plunger  | WLD |
| | Top-roller Plunger  | WLD2 WLD28 (See note.) |
| | Top-ball Plunger  | WLD3 |
| Horizontal | Horizontal Plunger  | W LSD |
| | Horizontal-roller Plunger  | W LSD2 |
| | Horizontal-ball Plunger  | W LSD3 |

Note: Sealed roller.

Standard Flexible Rods

| Actuators | | Model |
|---|--------------------|---------|
| Coil spring  | Spring dia. 6.5 | WLNJ |
| | Spring dia. 4.8 | WLNJ-30 |
| | Resin rod dia. 8.0 | WLNJ-2 |
| Steel wire  | 1.0-dia. wire | WLNJ-S2 |

Microload Models

A series of microload models has also been developed for the configurations outlined on pages 62 to 64. The model numbers become WL01□. For example, WLCA2 becomes WL01CA2.

Lamp-equipped Models

| Operating characteristics | Rated voltage | Leakage current | Lamp-equipped Switch | Lamp-equipped cover only |
|---------------------------|-------------------|-----------------|----------------------|--------------------------|
| Neon lamp | 125 VAC | Approx. 0.6 mA | WL□-LE (See note 1.) | WL-LE |
| | 250 VAC | Approx. 1.9 mA | | |
| LED | 10 to 115 VAC/VDC | Approx. 0.5 mA | WL□-LD (See note 1.) | WL-LD |

Note: 1. In the model number, □ indicates the actuator number. For example, CA2, D, NJ, etc.

2. The default setting is “light-ON when not operating.” Turn the lamp holder by 180° to change the setting to “light-ON when operating.”

Ordering Information

When ordering general-purpose indicator-equipped models insert the specifications number at the end of the basic model number.

E.g.: When a neon lamp is installed in a General-purpose/Standard Roller Lever Switch (WLCA2).

| | |
|--------------|---------------------|
| <u>WLCA2</u> | <u>LE</u> |
| ↑ | ↑ |
| Standard | Lamp specifications |

When ordering indicator-equipped molded terminal models, insert the specifications number at the end of the standard model number.

E.g.: When a Neon Lamp (WL-LE) is installed in a general-purpose molded terminal model (WLCA2-139).

| | | | |
|------------------|---------------------|-------------|--|
| <u>WLCA2-139</u> | <u>LE</u> | <u>2</u> | |
| ↑ | ↑ | ↑ | |
| Standard | Lamp specifications | Lamp wiring | 2: NC connection: Light-ON when operating 3: NO connection: Light-ON when not operating |

Note: The indicator cover cannot be replaced on the molded terminals. In all cases the indicator does not light when the load is ON.

Sensor I/O Connector Models

A reduction in the amount of wiring and parts makes maintenance easy and reduced wiring mistakes, in addition it's already compact size for fitting into areas of limited space.

Ordering Information

| Item | | Standard | Overtravel | High sensitivity |
|---|---------------------------------|----------|------------|------------------|
| Actuators | Rotating lever | Yes | Yes | Yes |
| | Plunger | Yes | --- | --- |
| Load | Standard load (SPST-NO/SPST-NC) | Yes | | |
| | Microload (SPST-NO/SPST-NC) | Yes | | |
| High-precision models WL-□55 | | Yes | | |
| Spatter-prevention models (See note 3.) | | Yes | | |
| Lamp | | Yes | | |

- Note:** 1. Standard Models: For standard models only one-side operation at an angle of 45° is possible.
 Overtravel Models: Only one-side operation at an angle of 80° is possible. One-side operation only is not possible.
 High-precision Models: Only one-side operation at an angle of 45° is possible, and pretravel (PT) is 5°, as opposed to 15° for standard models.
2. For information other than that listed at the above, contact your OMRON representative.
3. The spatter-prevention models are only available as pre-wired connectors.

Direct-wired Connectors

| Type | 2-core (NO) | 4-core |
|---------------|-------------|-------------|
| Lamp-equipped | WL□-LDK13 | WL□-LDK43 |
| Double-seal | WL□-55LDK13 | WL□-55LDK43 |

- Note:** 1. In the model number, □ indicates the actuator number. For example, Overtravel Model WL $\underline{G2}$ -LDK13.
2. The lamp is set to "light-ON when not operating" (NO connection).

Pre-wired Connectors

| Type | 2-core (NO) | 2-core (NC) | 4-core | 3-core (NO) |
|---------------|--------------|---------------|----------------|------------------|
| Lamp-equipped | WL□-LD-M1J | WL□-LD-M1JB | WL□-LD-DGJ03 | WL□-LD-DK1EJ03 |
| Double-seal | WL□-55LD-M1J | WL□-55LD-M1JB | WL□-55LD-DGJ03 | WL□-55LD-DK1EJ03 |

- Note:** 1. In the model number, □ indicates the actuator number. For example, Overtravel Model WL $\underline{G2}$ -LD-M1J.
2. The lamp is set to "light-ON when not operating" (NO connection).

Environment-resistant Models

Airtight, Hermetic Seal, Low-temperature, Heat-resistive, Corrosion-proof, and Weather-resistant Models

Using the general-purpose model, six types of environment-resistant models can be created to meet a variety of difficult operating conditions. Select the model most appropriate to your operating environment.

| Type | | Usage | Environment-resistant construction | | | Appropriate models | | |
|----------|--|---|--|---|---|--|--|---|
| WL□-55 | Airtight seal | For use in locations subject to splashes of water and anti-coolant | Uses the W-10FB3-55 Airtight Built-in Switch. (See note 2.) | | | All models except the low-temperature and heat-resistive models. (See note 3.) | | |
| WL□-139 | Hermetic seal (molded terminals and anti-coolant models) | | General-purpose built-in switch | Connection lead wires: Standard 5-m VCT (vinyl cabtire cable) cable attached. Finished diameter: 11.5 mm, 4-core. | The case cover and conduit opening are molded from epoxy resin. The cover cannot be removed. | All models except the low-temperature and heat-resistive models. (See note 4.) | | |
| WL□-140 | | | Hermetically-sealed built-in switch | Connection lead wires: Standard 5-m VCT cable, with high flexibility and good anti-oil properties attached. Finished diameter: 11.5 mm, 4-core. | | | The case cover, cover box and conduit opening are molded from epoxy resin. The cover cannot be removed (141, 145). The Head opening is protected from cutting powder. (WL□-141) | |
| WL□-141 | | | | | | | | |
| WL□-145 | | | | | | | | |
| WL□-RP40 | | | | | | | | The connector can be removed, so it is possible to use flexible wires in the cable. |
| WL□-RP60 | | | | | | | | Rubber parts are made from fluorine rubber. |
| WL□-TC | Low-temperature | Can be used at a temperature of -40°C (The operating temperature range is -40°C to 40°C), but cannot withstand icing. | Uses the general-purpose built-in switch. Silicone rubber is used for rubber parts such as the O-ring, gasket, etc. | | All models except airtight, hermetic, heat-resistive, corrosion-proof, or lamp-equipped models. | | | |
| WL□-TH | Heat-resistive | Can be used in temperatures of 120°C (The operating temperature range is 5°C to 120°C). | Uses a special built-in switch made from heat-resistant resin. Silicone rubber is used for rubber parts such as the O-ring, gasket etc. | | All models except airtight, hermetic, low-temperature, corrosion-proof, lamp-equipped, nylon roller (WLCA2-26N), seal roller models, and resin rod (WLNJ-2) models. | | | |
| WL□-RP | Corrosion-proof | For use in locations subject to corrosive gases and chemicals. | Diecast parts such as the switch box are made of corrosion-proof aluminum. Rubber sealing parts are made of fluorine rubber which aids in resisting oil, chemicals and adverse weather conditions. Exposed nuts and screws (except the actuator section) are made of stainless steel. Moving and rotary parts such as rollers are made of sintered stainless steel or stainless steel. | | All models except overtravel model (-2N), fork lever lock models (WLCA32-41 to -43), low-temperature, heat-resistive, and lamp-equipped models. | | | |
| WL□-P1 | Outdoor specifications | For use in parking lots and other such outdoor locations. | Rubber parts are made from silicone rubber, which has a high-tolerance to deterioration over time, and changes in temperature. Rollers are made of stainless steel to improve corrosion resistance. Exposed nuts and screws are made of stainless steel. | | Only the general-purpose overtravel models (WLH2/12), the overtravel high-sensitivity models (WLG2/12) and some standard models (e.g., WLCA2) can be used. Excluding heat-resistive models. | | | |

- Note:**
1. Consult your OMRON representative for the microload WL01□ models.
 2. Use the SC Connector for the conduit opening.
 3. The actuator can be created using the standard model.
 4. The actuator can be created using the standard model. For WL-□141 and -145, only WLG2, WLCA2, WLGCA2, and WLH2 can be used.

Ordering Information

Use the following as a guide when ordering environment-resistant models.

E.g.: For a hermetic model of WLCA2

WLCA2 - 55
 ↑ ↑
 Standard Specifications No.

An additional catalog is available for outdoor specifications models.

Spatter-prevention Models

These models are most effective in an arc welding line or places where cutting powder is spattered.

Standard Models

| Type | | Total travel (TT) | Actuators | Neon lamp | | LED |
|----------------|------------------|---|------------------|----------------|----------------|------------------|
| | | | | 125 VAC | 250 VAC | 10 to 115 VAC/DC |
| | | | | Approx. 0.6 mA | Approx. 1.9 mA | Approx. 0.5 mA |
| Standard | | One-side operation is possible  | Double nut lever | WLCA2-LEAS | | WLCA2-LDAS |
| | | | Allen-head lever | WLCA2-LES | | WLCA2-LDS |
| Overtravel | General | One-side operation is impossible  | Double nut lever | WLH2-LEAS | | WLH2-LDAS |
| | | | Allen-head lever | WLH2-LES | | WLH2-LDS |
| | High-sensitivity | | Double nut lever | WLG2-LEAS | | WLG2-LDAS |
| | | | Allen-head lever | WLG2-LES | | WLG2-LDS |
| High-precision | | One-side operation is possible  | Double nut lever | WLGCA2-LEAS | | WLGCA2-LDAS |
| | | | Allen-head lever | WLGCA2-LES | | WLGCA2-LDS |

Note: Consult your OMRON representative for the microload WL01□ models.

Levers/Lamp-equipped Covers

| Type | Without lever  | Complete Head (lever with Head)  | Double nut lever  | Allen-head lever  | Lamp-equipped cover  |
|-------|--|--|---|---|--|
| Model | Add an "R" to the product number to order. E.g.: WL□CA2-LES | WL-1H1100S (in case of WLCA2-□, WLGCA2-□) WL-2H1100S (in case of WLH2-□, WLG2-□) | WL-1A105S (forward and backward lever) | WL-1A103S (forward and backward lever) | WL-LES (Neon Lamp) WL-LDS (LED) |

Switches Without Lever

WLRCA2-LES, WLRCA2-LDS
 WLRH2-LES, WLRH2-LDS, WLRG2-LES
 WLRG2-LDS
 WLRGCA2-LES, WLRGCA2-LDS

Limit Switches

Head Models

| Actuators | Set model | Head model | Head model without lever |
|--|-----------|-------------------------|--------------------------|
| Roller lever  | WLCA2 | WL-1H1100 | WLRCA2 |
| | WLGCA2 | WL-1H1100-1 (See note.) | WLRGCA2 |
| | WLG2 | WL-2H1100 | WLRG2 |
| | WLH2 | WL-2H1100-1 (See note.) | WLRH2 |
| | WLCA2-2N | WL-6H1100 | WLRCA2-2N |
| Adjustable roller lever  | WLCA12 | WL-1H2100 | WLRCA2 |
| | WLG12 | WL-2H2100 | WLRG2 |
| | WLH12 | WL-2H2100-1 (See note.) | WLRH2 |
| | WLCA12-2N | WL-6H2100 | WLRCA2-2N |
| Adjustable rod lever  | WLCL | WL-4H4100 | WLRCL |
| | WLGL | WL-2H4100 | WLRG2 |
| | WLCL-2N | WL-6H4100 | WLRCA2-2N |
| Top plunger  | WLD | WL-7H100 | --- |
| | WLD2 | WL-7H200 | |
| | WLD3 | WL-7H300 | |
| | WLD28 | WL-7H400 | |
| Horizontal plunger  | WLS | WL-8H100 | --- |
| | WLS2 | WL-8H200 | |
| | WLS3 | WL-8H300 | |
| Fork lever lock  | WLCA32-41 | WL-5H5100 | WLRCA32 |
| Coil spring  | WLNJ | WL-9H100 | --- |
| | WLNJ-30 | WL-9H200 | |
| | WLNJ-2 | WL-9H300 | |
| | WLNJ-S2 | WL-9H400 | |

Note: For the model number of Heads without lever, simply remove the numbers after WL-□H. For example, WL-1H1100 becomes WL-1H. WLH2 and WLH12 however, become WL-2H-1, and WLGCA2 becomes WL-1H-1. Other Head models are available, but must be ordered separately.

Specifications

■ Approved Standards

| Agency | Standard | File No. |
|---------------|------------------|----------|
| UL | UL508 | E76675 |
| CSA | CSA C22.2 No. 14 | LR45746 |
| TÜV Rheinland | EN60947-5-1 | R9551016 |

Note: Contact your OMRON representative for more information on approved models.

■ Approved Standard Ratings

- Note:**
1. The above figures are for standard currents.
 2. Inductive loads have a power factor of 0.4 min. (AC) and a time constant of 7 ms max. (DC).
 3. Lamp load has an inrush current of 10 times the steady-state current.
 4. Motor load has an inrush current of 6 times the steady-state current.

| | | |
|-----------------------|-------------------------------|-----------|
| Inrush current | NC | 30 A max. |
| | NO | 20 A max. |
| Operating temperature | -10°C to 80°C (with no icing) | |
| Operating humidity | 95% max. | |

■ Characteristics

General-purpose Models/Environment-resistant Models

| | |
|---|--|
| Degree of protection | IP67 |
| Durability (See note 3.) | Mechanical: 15,000,000 operations min. (See note 4.) Electrical: 750,000 operations min. (See note 5.) |
| Operating speed | 1 mm to 1 m/s (for WLCA2) |
| Operating frequency | Mechanical: 120 operations/minute min. Electrical: 30 operations/minute min. |
| Rated frequency | 50/60 Hz |
| Insulation resistance | 100 MΩ min. (at 500 VDC) |
| Contact resistance | 25 mΩ max. (initial value) |
| Dielectric strength | 1,000 VAC (600 VAC), 50/60 Hz for 1 min between non-continuous terminals. 2,200 VAC, 50/60 Hz for 1 min/Uimp 2.5 kV non-current-carrying metal part and ground. 2,200 VAC, 50/60 Hz for 1 min Uimp 2.5 kV between each terminal and non-current-carrying metal part. |
| Rated insulation voltage (U _i) | 250 V (EN60947-5-1) |
| Switching overvoltage | 1,000 V max. (EN60947-5-1) |
| Pollution degree (operating environment) | 3 (EN60947-5-1) |
| Short-circuit protective device (SCPD) | 10 A, fuse type gG or gI (IEC269) |
| Conditional short-circuit current | 100 A (EN60947-5-1) |
| Conventional enclosed thermal current (I _{the}) | 10 A, 0.5 A (EN60947-5-1) |
| Protection against electric shock | Class I |
| Vibration resistance | 10 to 55 Hz, 1.5-mm double amplitude (See note 6.) |
| Shock resistance | Destruction: 1,000 m/s ² min. Malfunction: 300 m/s ² min. (See note 6.) |
| Ambient temperature | Operating: -10°C to 80°C (with no icing) (See note 7.) |
| Ambient humidity | Operating: 95% max. |
| Weight | Approx. 275 g (in the case of WLCA2) |

- Note:**
1. The above figures are initial values.
 2. The figures in parentheses for dielectric strength, are those for the overtravel (high-sensitivity) model.
 3. The values are calculated at an operating temperature of 5°C to 35°C, and an operating humidity of 40% to 70%. Contact your OMRON sales representative for more detailed information on other operating environments.
 4. 10,000,000 operations min. for general-purpose, high-sensitivity, and flexible rod overtravel models.
 5. 500,000 operations min. for high-precision and outdoor specifications models. All microload models however, are 1,000,000 operations min.
 6. Except the flexible rod models. The shock resistance (malfunction) for microload models is 200 m/s² min.
 7. For low temperature models this is -40°C to 40°C (no icing). For heat-resistant models the range is +5°C to 120°C.

Engineering Data

General-purpose Models/Spatter-prevention Models/Environment-resistant Models

Electrical Durability

Operating temperature: 5°C to 30°C
 Operating humidity: 40% to 70%.

Nomenclature

General-purpose Models

- Note:**
1. The display for conduit threads has changed from PF $\frac{1}{2}$ to G $\frac{1}{2}$ according to revisions of JIS B 0202. This is only a change in the display, so the thread size and pitch have not changed. (Conduit threads Pg 13.5 and $\frac{1}{2}$ -14NPT are also available.)
 2. By changing the orientation of the operational plunger, three operational directions can be selected electrically. (This is only possible with general-purpose roller lever, adjustable roller lever, and adjustable rod lever models. For the overtravel models, only -2N Series models have this function.)

Lamp-equipped Models

The operating status of the Switch can be checked using a neon lamp or LED indicator.

Circuit checks and troubleshooting errors are easy done.

The built-in switch's terminal screws are used to connect the lamp terminal (indicator cover). Since the connection spring (coil spring) is used for this connection, it will not be necessary to connect to the lamp terminal. When a ground terminal is provided however, lead wire method must be used.

WL-LD has a built-in rectifier stack, so it will not be necessary to change the polarity.

The indicator cover is molded from diecast aluminum and has outstanding sealing properties. Furthermore, regardless of whether the power is connected or not, the operating status is shown (operating or not operating), and indicators can be switched from light-ON when operating and light-ON when not operating, by simply rotating the lamp holder by 180°. (Molded terminals do not have this switching capacity.)

The lamp-equipped models are ideal in locations using a conveyor belt where items need to be checked, or locations that are difficult to inspect for faults.

Light-ON when Operating

Light-ON when Not Operating

■ Environment-resistant Models

Airtight Built-in Switch

Hermetic Seal Model

The lead wires are sealed to the Limit Switch with resin, providing a hermetically sealed construction.

Note: 1. Flexible Rod Models: For all models WL□ indicates a standard model and WL01□ indicates a microload model.
2. Unless otherwise indicated, a tolerance of ±0.4 mm applies to all dimensions.

Coil Spring

WLNJ
WL01NJ

Coil Spring (Multi-wire)

WLNJ-30
WL01NJ-30

Note: 1. The coil spring may be operated from any direction except the axial direction (↓).
2. Stainless steel coil spring
3. Optimum operating range of the coil spring is within 1/3 of the entire length from the top end.

Note: 1. The coil spring may be operated from any direction except the axial direction (↓).
2. Piano wire coil
3. Optimum operating range of the coil spring is within 1/3 of the entire length from the top end.

Coil Spring (Resin Rod)

WLNJ-2
WL01NJ-2

Note: 1. The coil spring may be operated from any direction except the axial direction (↓).
2. Polyamide resin rod
3. Optimum operating range of the rod is within 1/3 of the entire length from the top end.

Steel Wire

WLNJ-S2
WL01NJ-S2

Note: 1. The coil spring may be operated from any direction except the axial direction (↓).
2. Stainless steel wire
3. Optimum operating range of the wire is within 1/3 of the entire length from the top end.

| Operating characteristics | WLNJ WL01NJ (See note.) | WLNJ30 WL01NJ30 (See note.) | WLNJ-2 WL01NJ-2 (See note.) | WLNJ-S2 WL01NJ-S2 (See note.) |
|---------------------------|-------------------------------|-----------------------------------|-----------------------------------|-------------------------------------|
| Operating force: OF max. | 1.47 N | 1.47 N | 1.47 N | 0.28 N |
| Pretravel: PT | 20±10 mm | 20±10 mm | 40±20 mm | 40±20 mm |

Note: These values are taken from the top end of the wire or spring.

Overtravel Models

Overtravel models are Limit Switches which are provided with a greater OT to facilitate dog setting.

The overtravel models are classified into three types; general-purpose, high-sensitivity, and models which are capable of one-side 90° operation, the -2N Series.

The -2N Series can also be installed on either side.

Since this model is identical to the standard model in dimensions, both models are interchangeable.

Like the standard model, it is oil-tight, waterproof, and dustproof (complies with IP67).

| General-purpose, high sensitivity models | Side-installation models |
|---|---|
|  |  |
| Head can be mounted in any of the four directions. The lever operates on either side at 80°. | The Head can be mounted in two directions, forward and backward. The lever operates on either side at 90°. |
| One-side operation is impossible. | One side operation is possible. |

General-purpose/High Sensitivity Models

- Note:**
- For all models WL□ indicates a standard model and WL01□ indicates a microload model.
 - One-side operation is not possible with the general-purpose and high-sensitivity models.
 - Unless otherwise indicated, a tolerance of ±0.4 mm applies to all dimensions.

Roller Lever

WLH2
WL01H2
WLG2
WL01G2

- Note:**
- Stainless sintered roller
 - WL□G2 is identical to other models except in the shape of the set position marker plate.
 - The built-in switch for WLH2 is W-10FB3.
 - The built-in switch for WLG2 is W-10FB3-8.

Adjustable Rod Lever

WLHL
WL01HL
WLGL
WL01GL

- Note:**
- WL□GL is identical to other models except in the shape of the set position marker plate.
 - The built-in switch for WLHL is W-10FB3.
 - The built-in switch for WLGL is W-10FB3-8.

Adjustable Roller Lever

WLH12
 WL01H12
 WLG12
 WL01G12

- Note:**
1. Stainless sintered roller
 2. WL□G12 is identical to other models except in the shape of the set position marker plate.
 3. The built-in switch for WLH12 is W-10FB3.
 4. The built-in switch for WLG12 is W-10FB3-8.

| Operating characteristics | WLH2 WL01H2 | WLG2 WL01G2 | WLHL WL01HL (See note 2.) | WLGL WL01GL (See note 2.) | WLH12 WL01H12 (See note 1.) | WLG12 WL01G12 (See note 1.) |
|--------------------------------|----------------|---------------------------------|---------------------------------|---------------------------------|-----------------------------------|-----------------------------------|
| Operating force: OF max. | 9.81 N | 9.81 N | 2.84 N | 2.84 N | 9.81 N | 9.81 N |
| Release force: RF min. | 0.98 N | 0.98 N | 0.25 N | 0.25 N | 0.98 N | 0.98 N |
| Pretravel: PT | 15±5° | 10 ⁰⁺² ₋₁ | 15±5° | 10 ⁰⁺² ₋₁ | 15±5° | 10 ⁰⁺² ₋₁ |
| Overtravel: OT min. | 55° | 65° | 55° | 65° | 55° | 65° |
| Movement differential: MD max. | 12° | 7° | 12° | 7° | 12° | 7° |

- Note:**
1. The operating characteristics of WLH12, WL01HL12, WLG12, and WL01G12 are measured at the lever length of 38 mm.
 2. The operating characteristics of WLHL, WL01HL, WLGL, and WL01GL are measured at the rod length of 140 mm.

OF and RF for WLH12 and WL01H12, with a lever length of 89 mm.

| Operating characteristics | WLH12, WL01H12 | WLG12, WL01G12 |
|---------------------------|-------------------|-------------------|
| OF | 4.18 N | 4.18 N |
| RF | 0.42 N | 0.42 N |

- Note:** 1. For all models WL□ indicates a standard model and WL01□ indicates a microload model.
 2. Unless otherwise indicated, a tolerance of ±0.4 mm applies to all dimensions.

Adjustable Rod Lever

WLHAL4
 WL01HAL4

Note: Stainless steel rod

Rod Spring Lever

WLHAL5
 WL01HAL5

Note: Piano wire

| Operating characteristics | WLHAL4 WL01HAL4 (See note 2.) | WLHAL5 WL01HAL5 |
|--------------------------------|-------------------------------------|--------------------|
| Operating force: OF max. | 0.98 N | 0.90 N |
| Release force: RF min. | 0.15 N | 0.09 N |
| Pretravel: PT | 15±5° | 15±5° |
| Overtravel: OT min. | 55° | 55° |
| Movement differential: MD max. | 12° | 12° |

Note: 1. With WLHAL4, WL01HAL4, WLHAL5, and WL01HAL5, the actuator's tare is large, so depending on the installation direction, they may not be properly reset. Always install so that the actuator is facing downwards.

2. The operating characteristics of WLHAL4, and WL01HAL4 are measured at the rod length of 380 mm.

Side-installation Models

90° operation on one side is possible by simply changing the direction of the cam.

Note: 1. For all models WL□ indicates a standard model and WL01□ indicates a microload model.

2. With the side-installation models, 90° operation on one side is possible by simply changing the direction of the cam.
 3. Unless otherwise indicated, a tolerance of ±0.4 mm applies to all dimensions.

Roller Lever

|--------------------------------|------------------------|---|---------------------------------------|
| Operating force: OF max. | 9.61 N | 9.61 N | 2.84 N |
| Release force: RF min. | 1.18 N | 1.18 N | 0.25 N |
| Pretravel: PT max. | 20° | 20° | 20° |
| Overtravel: OT min. | 70° | 70° | 70° |
| Movement differential: MD max. | 10° | 10° | 10° |

Note: 1. The operating characteristics of WLCA12-2N and WL01CA12-2N are measured at the lever length of 38 mm.
 2. The operating characteristics of WLCL-2N and WL01CL-2N are measured at the rod length of 140 mm.

OF and RF for WLCA12-2N and WL01CA12-2N, with a lever length of 89 mm.

| Operating characteristics | WLCA12-2N, WL01CA12-2N |
|---------------------------|------------------------|
| OF | 4.10 N |
| RF | 0.50 N |

High-precision Models

The high-precision models feature a pretravel of 5° (as compared with 15° for the standard models) and a repeat accuracy twice as great as standard models. The high-precision models are ideal for positioning control of machine tools.

For all models WL□ indicates a standard model and WL01□ indicates a microload model.

Note: Unless otherwise indicated, a tolerance of ±0.4 mm applies to all dimensions.

| <p>Adjusting the length of the rod or lever The length of the rod or lever can be adjusted by loosening the Allen-head bolt.</p> | <p>Adjustable Roller Levers: WLCA12, WL01CA12 etc. Adjustable Rod Levers: WLCL, WL01CL, etc.</p> | <p>WLCA12 etc.</p>  <p>Loosen this Allen-head bolt and adjust the length of the lever.</p> <p>Adjustment range: 25 to 89 mm</p>  <p>Loosen this Allen-head bolt and adjust the length of the rod.</p> |

■ Operation of Fork Lever Locks

The fork lever lock is configured so that the dog pushes the lever to reverse the output and this reversed state is maintained even after the dog continues on. If the dog then pushes the lever from the opposite direction, the lever will return to its original position.

Example

NC terminal: ON NO terminal: ON NO terminal: ON

Precautions

Refer to the *Technical Information for Limit Switches* (Cat. No. C121).

Correct Use

When a rod or wired-type actuator is used, do not touch the top end of the actuator. Doing so may result in injury.

Applicable models: WLHAL5 and WL01HAL5 Rod Spring Levers and WLNJ-S2 and WL01NJ-S2 Steel-wire Actuators.

A short-circuit may cause damage to the Switch, so insert a circuit breaker fuse, of 1.5 to 2 times the rated current, in parallel with the Switch. In order to meet EN approval ratings, use a 10-A fuse that corresponds to IEC269, either a gI or gG for general-purpose types and spatter-prevention models only.

When wiring terminal screws, use M4 round crimp terminals and tighten screws to the recommended torque. Wiring with broken wires, or the incorrect crimp terminals, or not tightening screws to the recommended torque can lead to short-circuits, leakage current, and fire.

When performing internal wiring there is a chance of short-circuit, leakage current, or fire, so be sure to protect the inside of the Switch from splashes of oil or water, corrosive gases, and cutting powder.

Using an inappropriate connector or assembling Switches incorrectly (assembly, tightening torque) can result in malfunction, leakage current, or fire, so be sure to read the instruction manual thoroughly beforehand.

Even when the connector is assembled and set correctly, the end of the cable and the inside of the Switch may come in contact. This can lead to malfunction, leakage current, or fire, so be sure to protect the end of the cable from splashes of oil or water and corrosive gases.

Environmental Precautions

When the Switch is used in locations subject to splashes of water or oil, the material of the seal, which ensures the sealing properties of the Switch, may undergo changes in shape and quality. This is due to deterioration (including expansion and contraction), and may result in reduced performance, ineffective return, and ineffective sealing (leading to ineffective contact, insulation, leakage current, and fire). Confirm the possible effects of the operating environment on the Switch before use.

Built-in Switch

Do not remove or replace the built-in switch. If the position of the built-in switch moves, it can cause reduced performance, and if the insulation sheet moves (separator), the insulation may become ineffective.

Tightening Torque

If screws are too loose they can lead to an early malfunction of the Switch, so ensure that all screws are tightened using the correct torque.

| No. | Type | Torque |
|-----|--|------------------|
| ① | Head mounting screw | 0.78 to 0.88 N·m |
| ② | Cover mounting screw | 1.18 to 1.37 N·m |
| ③ | Allen-head bolt (for securing the lever) | 4.90 to 5.88 N·m |
| ④ | Terminal screw | 0.59 to 0.78 N·m |
| ⑤ | Connector | 1.77 to 2.16 N·m |
| ⑥ | Main Unit screws | 4.90 to 5.88 N·m |

In particular, when changing the direction of the Head, make sure that all screws are tightened again to the correct torque. Do not allow foreign objects to fall into the Switch.

Installing the Switch

To install the Switch, make a mounting panel, as shown in the following diagram, and tighten screws using the correct torque.

| Standard/Overtravel model | Overtravel model (side installation) |
|---|--|
| <p>Mounting holes</p> <p>Four, $5.2^{+0.2}_0$ dia. holes</p> | <p>Mounting holes</p> <p>Two, $5.2^{+0.2}_0$ dia. holes</p> |

Connectors

Either the easy-to-use Allen-head nut or the SC Connector can be used as connectors. To ensure high-sealing properties, use the SC Connector. Consult your OMRON representative for details on SC Connectors.

Limit Switches

Wiring

Use 1.25-mm lead wires and M4-insulation covered crimp terminals for wiring.

Crimp Terminal External Dimensions

| | |
|----------|----------|
| dz dia.: | 4.3 |
| D dia.: | 4.5 |
| B: | 8.5 |
| L: | 21.0 |
| F: | 7.8 |
| l : | 9.0 (mm) |

Wiring Method

Switch Box Section

Note: The ground terminal is only installed on models with ground terminals.

Rotating Lever Set Position

All rotating lever models, except the fork lever lock, have a set position marker plate. (See page 75.) After operation, set the indicator needle on the marker plate so that it is in the convex section of the bearing.

Terminal Plate

By using a short circuit plate, as shown in the following diagram, the Switch can be fabricated into a single-polarity double-break model. When ordering specify WL Terminal Plate (product code: WL-9662F).

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.
To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.
