General presentation

The Telefast system is a set of products for rapid connection of I/O modules (--- 24 V discrete, analogue and counter) to operative parts. It acts as a substitute for screw terminal blocks, remotely locating and partly eliminating the single-wire connection. The Telefast system only connects to channels which have HE 10 and SUB-D connectors or to standard terminal blocks with a cabled connector. It consists of connecting cables and interface sub-bases. The relay and connection functions, with or without polarity distribution, considerably reduce wiring time and eliminate the risk of error.

Connections between the PLC and the operative part

Connection between the PLC and Telefast sub-bases

Telefast sub-bases connect directly via cables onto all discrete I/O modules fitted with HE 10 connectors **1**. I/O modules not fitted with HE 10 connectors are connected to Telefast sub-bases by means of a cabled connector, which consists of a cable whose conductors (0.34 mm² c.s.a.) are connected to the standard terminal block at one end and to the HE 10 connectors at the other. These cabled connectors are available in 1.5 and 3-metre lengths.

Connection between Telefast sub-bases and the operative part

The Telefast range is suitable for several types of connection found in control system devices.

■ Connection of I/O located in the PLC cabinet **A** or nearby **B**.

Some sub-bases **2** enable two wires (signal and common) or **3** wires (signal, 24 V, 0 V) to be connected directly from sensors or preactuators when the latter **10** are installed in the same enclosure or very close by. They effectively eliminate all intermediate terminal blocks.

Other versions offer the possibility of adapting the voltage or current via plug-in relay sub-bases **3**, or of connecting analogue signals **9**.

In cases where size is of prime importance **D**, fixed relay sub-bases **ABE7R16S111 5** (125 mm long) and passive sub-bases **ABE7H16R50 6** (84 mm long) reduce the required surface area by about 50 % compared with standard products.

■ Connection of I/O located outside the PLC cabinet **C**.

These sub-bases **4** which connect connector leads from sensors or preactuators **7, 8** fulfil the same function as traditional terminal blocks.

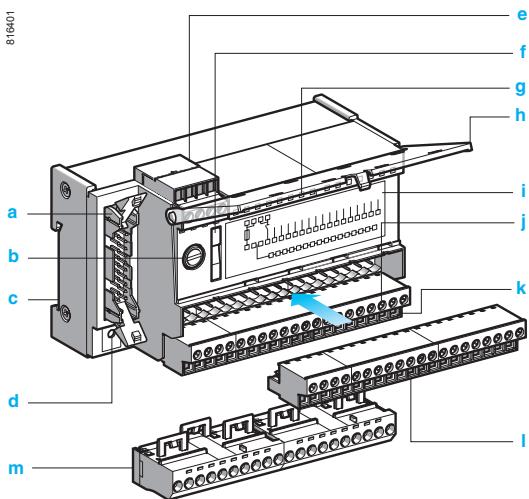

■ IP67 dust and damp-proof connections for enclosures and cabinets

Eight-channel versions offer, in addition, the possibility of directly connecting the **XSZ** dust and damp-proof splitter blocks **11** (see page 60) for height sensors.

Telefast Pre-wired System

Modicon ABE7 connection sub-bases
Passive connection sub-bases

816401

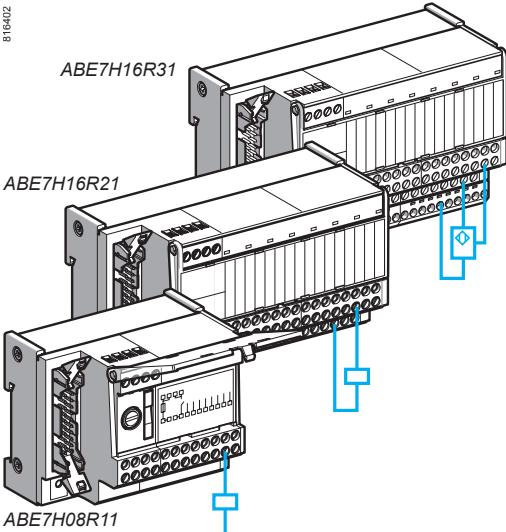

Description of a Telefast® 2 connection sub-base

All connection sub-bases in the Telefast family have a standardised design and offer the common functions described below.
Some of these functions are optional*.

- a 20-way HE10 connector
- b ... 24 V power supply circuit fuse
- c Fixing on DIN rail
- d ... 24 V display LED
- e ... 24 V power supply terminal block (1)
- f Blade type isolator on ... 0 V
- g Channel indication LED*
- h Customer label-holder/cover
- i Wiring diagram
- j Test point for Ø 2.3 mm plug
- k Upper terminal block (1)
- l Lower terminal block (1), offset by 1/2 step*
- m Additional clip-on terminal block fitted with 20 screw or spring terminals*

(1) Removable screw or spring type, according to reference, at 5.08 mm intervals.

816402

Passive connection sub-bases

Designed to simplify I/O connection to a PLC within a control panel, the range of passive sub-bases has the same functions as traditional terminal blocks to which they add, depending on the models: compact size, connection of proximity sensor commons (3-wire and type 2), LED indication, protected and isolated channels. For high sales volume products, screw or spring connections are available (references ending with E).

Terminal block sub-bases

ABE7H●●R11/R10: these products can be used to connect inputs or outputs. The commons are made on the device and brought into the sub-base by a single wire. The output terminals are on a single row.

The signal state for each channel can be indicated via an LED (R11) or not (R10). A terminal block sub-base ABE7BV●0 can be added.

ABE7H20E●●/7H32E●●: these extremely **economical** products are supplied with a direct connection cable for TSXMicro, Premium or other PLCs using splitter sub-base H20E, or for Siemens S7 PLCs (using splitter sub-base H32E). The cable is available in 3 or 2 metre lengths respectively. The output terminals are on 2 rows.

Compact sub-bases

ABE7H●●R50: these products fulfil the same functions as the previous sub-bases but their size is reduced by almost half.

The output terminals are in fact on two rows.

ABE7H16C1●/CM11: these are **miniature** products. The signal state for each channel can be indicated via an LED (C11/CM11) or not (C10). The output terminals are on a single row. A terminal block sub-base ABE7BV●0 can be added.

Universal sub-bases

ABE7H●●R21/R20: these sub-bases are used to connect I/O, and all the commons. The potential (0 V or ... 24 V), distributed over the row of screw terminals which allow the commons to be connected, is selected via a jumper. Both wires of the sensor or actuator can be connected to the sub-base. The output terminals are on 2 rows.

The signal state for each channel can be indicated via an LED (R21) or not (R20).

ABE7H16C21/CM21: these are **miniature** products. The signal state for each channel can be indicated via an LED. Reference CM21 has two commons connections which allow both the inputs and outputs to be connected at the same time, with a 0 or 24 V common, according to the customer's wiring. The output terminals are on 2 rows.

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Passive connection sub-bases

Electromechanical relay output sub-bases

Passive connection sub-bases (continued)

Sub-bases for 2-wire sensors

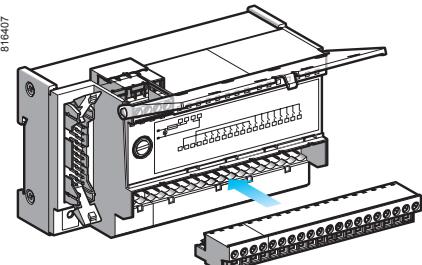

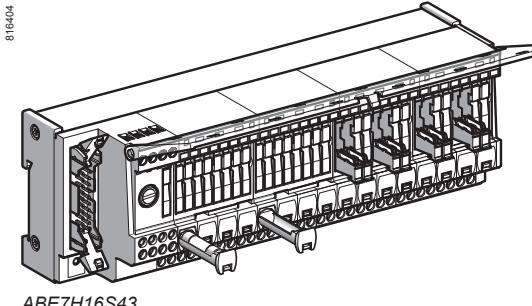

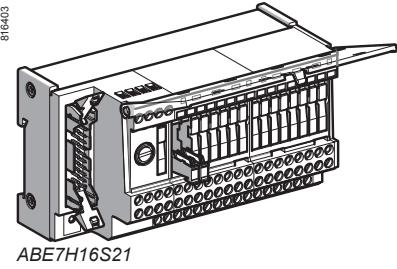

ABE7H16R23: this product is identical to the ABE7H16R21 sub-bases but, in addition, enables connection of 2-wire type 2 sensors on the TSXMicro and Premium and Num N.C.

Sub-bases for 3-wire sensors

ABE7H16R31/R30: the ~ 24 V and 0 V signals are brought into the sub-base for each channel. The output terminals are on three rows. This function can also be achieved by adding an ABE7BV20 add-on terminal block to the ABE7H16R21/R20 sub-bases.

The signal state for each channel can be indicated via an LED (**R31**) or not (**R30**).

ABE7H16C31: these are **miniature** products. They also enable connection of inputs equipped with 3-wire proximity sensors. The output terminals are on 3 rows.

Sub-bases with isolator for each channel

ABE7H00S21: these products have the same function as the ABE7H16R21 universal sub-base.

In addition, they also have a blade isolator for each channel.

Sub-bases with isolator and protection for each channel

ABE7H16S43: these products are used exclusively for connecting ~ 24 V **inputs**. Both wires are brought to the screw terminals on a single row. Each channel has 2 blade isolators, fixed together, to isolate the signal and its ~ 24 V supply.

The ~ 24 V supply to each channel is protected by a 5 x 20 fuse. A red LED indicates if the fuse has blown.

ABE7H16F43: these products are designed for connecting ~ 24 V **outputs**.

Both wires are brought to the screw terminals on a single row.

Each channel has 2 blade isolators, fixed together, to isolate the signal and its 0V common.

Electromechanical relay output sub-bases

Relay output sub-bases are designed to adapt both current and voltage signals. They also have the following functions, depending on the model: various contact combinations (1 N/O, 1 C/O, 2 C/O), common potentials, channel protection by 5 x 20 fuse.

There are 3 ranges of sub-bases: fixed relay, plug-in relay and high-performance. For high sales volume products, screw or spring connections are available (references ending with E).

Sub-bases with fixed relays and removable terminal blocks

ABE7R00S21•: these products are equipped with a fixed relay, with integral N/O contact, 10 mm wide. Their 5 A lth characteristic must be derated according to the duty cycles used and the number of operations required.

They are available in 8 and 16-channel modules. All the terminal blocks are removable.

ABE7R00S111: almost 50% smaller than the standard sub-bases, these products have a fixed relay, integrating an N/O contact, 5 mm wide. Their 2 A lth characteristic must be derated according to the duty cycles used and the number of operations required. They are available in 8 and 16-channel modules. All the terminal blocks are removable.

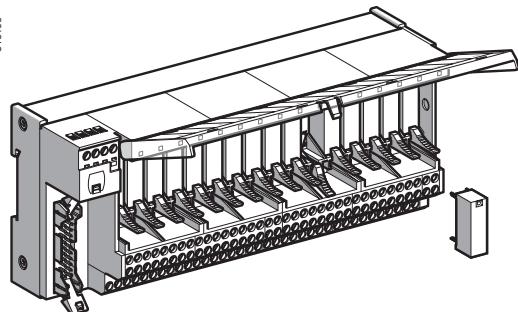

ABE7R08S216: these **miniature** products are equipped with latching relays which can withstand a current of 2 A at ~ 230 V. They enable 2 output wires to be connected on a removable terminal block. Two PLC outputs are used per channel: one for tripping the relay, the other for resetting it. The relay stays in the de-energised position. The signal state for each channel can be indicated via an LED.

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Electromechanical relay output sub-bases

816406

ABE7R16T2••

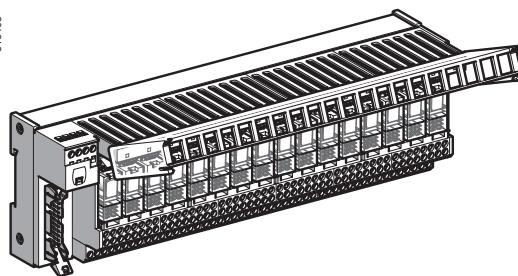

Plug-in relay sub-bases

ABE7P16T2•• and 7R16T2••: these products may or may not be equipped with plug-in relays, with integral N/O or C/O contact, 10 mm wide. Their 5 A I_{th} characteristic must be derated according to the duty cycles used and the number of operations required. They are available in 16-channel modules only. ABR7S2• electromechanical relays and ABS7S•2• solid state relays can be combined on the same sub-base. Some sub-bases, not equipped with relays, are offered with 5 x 20 fuse protection for each channel.

ABE7•16T11/M111: these **miniature** products use plug-in relays, 5 mm wide, with integral N/O contact, rated up to 5 A. These products may be pre-equipped with relays (**R**) or not (**P**). They can be fitted with both electromechanical and solid state relays.

Sub-bases **ABE7•16M111** offer two connection methods which make it possible to connect both inputs and outputs and obtain 8 inputs (passive connection) and 8 outputs (active relay connection). The signal state for each channel can be indicated via an LED. The terminals are on one row and the commons are brought in, in groups of 4. The sub-base is supplied with a relay extractor; this accessory is also available as a spare part.

816405

ABE7R16T3••

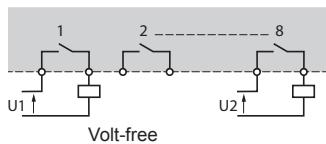

High performance sub-bases for plug-in relays

ABE7P••T3•• and 7R16T3••: these products may or may not be equipped with plug-in relays, with integral 1 C/O or 2 C/O contacts, 12 mm wide. Their 8 A I_{th} characteristic must be derated according to the duty cycles used and the number of operations required.

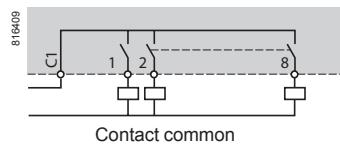

The relays are equipped with reinforced Faston type clips for easy attachment. They are available in 8 and 16-channel modules. ABR7S3• electromechanical relays, ABS7S•3• solid state relays and ABE7ACC21 continuity block can all be combined on the same sub-base. Some sub-bases, not equipped with relays, are offered with 5 x 20 fuse protection and isolation for each channel.

Connections

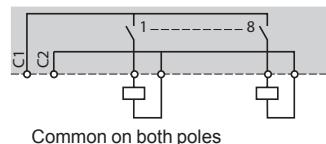

These relay sub-bases can be connected according to three possible schemes: volt-free, contact common and common on both poles.

816408

816409

816410

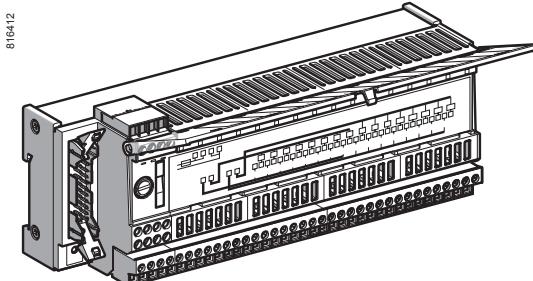

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

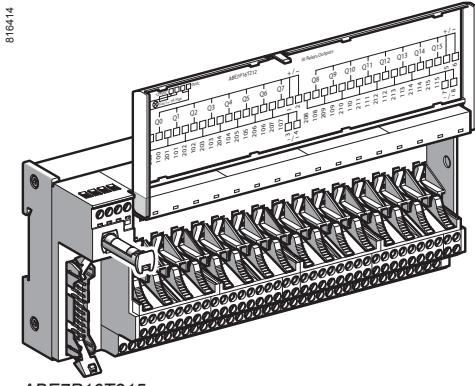

Solid state input or output sub-bases

Solid state input or output sub-bases

Solid state input or output sub-bases are designed to adapt both current and voltage signals. They can be used to interface either inputs or outputs. Their technology enables high-speed signal switching, while maintaining a high level of electrical durability. For high sales volume products, screw or spring connections are available (references ending with E).

ABE7S16E2B1

ABE7P16T215

Input adapter sub-bases

Sub-bases equipped with solid state channels ABE7S16E $\bullet\bullet$:

these sub-bases enable sensors with different voltages to be connected (~ 24 V to ~ 230 V according to the reference).

These products provide electrical isolation for the various power supply inputs. They are available in 16-channel modules only and the terminal blocks are removable.

Sub-bases for plug-in solid state relays ABE7P16F $\bullet\bullet$:

these sub-bases enable sensors with different voltages to be connected (~ 24 V to ~ 230 V), either on each channel or on each group of 8 channels.

They are available in 16-channel modules only.

The solid state relays are available separately. It is also possible to equip the sub-bases with electromechanical relays (please consult your Regional Sales Office).

Output adapter sub-base

Sub-bases equipped with solid state channels ABE7S $\bullet\bullet$ S $\bullet\bullet$:

these sub-bases enable actuators to be connected at ~ 24 V. The outputs are not isolated. The output current is, depending on the products, 0.5 or 2 A per channel. The occurrence of overloads or short-circuits on the outputs can be transmitted to the PLC to be managed by program. These "fault report" functions can only be used with TSXMicro and Premium PLCs or with any other PLCs which have protected outputs. They are available in 8 and 16-channel modules, and the terminal blocks are removable.

Plug-in solid state relays

ABS7S plug-in relays are not available mounted directly on the sub-bases. They must be ordered separately.

These relays are available for two power levels:

- from ~ 5 V to ~ 240 V/0.5 A, 10 mm wide. These are for mounting on **ABE7P16T2 $\bullet\bullet$** sub-bases,
- from ~ 5 V to ~ 240 V/1.5 and 2 A, 12 mm wide. These are for mounting on **ABE7P16T3 $\bullet\bullet$** or **ABE7P08T330** sub-bases,

It is possible to combine electromechanical relays and solid state relays, as well as continuity blocks, on the same sub-base.

They are available in 16-channel modules only.

ABFA32H•00

ABE7ACC02

Analogue sub-bases and special functions

Analogue signals are connected on the following products:

- Sub-base **ABE7CPA01** for the counter modules in the TSXMicro and premium range. It also communicates with the Altivar 18 variable speed drive.
- Sub-base **ABE7CPA02** for connection and distribution of 8 channels over screw terminals while maintaining shielding continuity.
- Sub-base **ABE7CPA21** with identical functions to the previous sub-base for the 4 analogue output channels.
- Sub-base **ABE7CPA03** can also supply 2 or 4-wire sensors, channel by channel, with \sim 24 V protected voltage and current limiting at 25 mA. In addition, it ensures continuity of the current loops when the 25-way SUB-D connector is unplugged.
- Sub-base **ABE7CPA31** enables distribution and isolation of the \sim 24 V power supply required for the 8 analogue input channels while maintaining isolation between channels of the TSXAEY810 module. Limitation for all channels is 25 mA.
- Sub-base **ABE7CPA11** enables the value from a parallel output absolute encoder to be read (binary or GRAY code). It is connected to a counter or axis control module in the Premium range.
- Sub-base **ABE7CPA12** can be used to connect 16 thermocouples and to increase the temperature of the terminal blocks for cold junction compensation, either by a probe integrated in the sub-base, or remotely via an external PT100 probe. In the latter case, only 14 thermocouples can be connected.
- Sub-base **ABE7CPA13** simplifies connection of safety module TSXPAY2•2 on the Premium. It allows the connection of 12, double contact Emergency stops.

Accessories for connection sub-bases

The Telefast pre-wired system offers a range of accessories to simplify the installation of equipment and to enable full use of all features offered by the connection sub-bases.

Connection to the PLC: cables and cabled connectors

Cables

Only **ABFH20H•00** cables, made from rolled ribbon cable and HE 10 insulation piercing connectors are truly universal. Owing to their small size, they can be connected to any I/O modules or terminal blocks fitted with 20-way HE 10 connectors. They are available in lengths of 0.5 to 5 m, but the user can create custom cables up to a maximum length of 30 m using additional cable and HE 10 connectors.

TSXCDP•03 moulded cables are only used with the TSXMicro and Premium ranges. They are multicore cables and have a high quality finish. Custom cables are also available for the Allen Bradley and Siemens ranges of PLCs.

Cabled connectors

When the PLC I/O modules do not have rapid connection features, the cables and terminal blocks are pre-assembled by us to produce a pre-wired solution. Telefast can therefore offer cabled connectors suitable for the Modicon, April (**ABFA32H•00**) and Telemecanique ranges of analogue modules.

Splitter sub-bases

When module configuration and signal distribution are not compatible, the Telefast system can use **ABE7ACC0•** splitter sub-bases:

- 16 channels (2 x 8) for all 16-channel outputs,
- 24 channels (3 x 8) for DST2472 modules,
- 32 channels (2 x 16) for NUM inputs,
- 24 channels (3 x 8) for NUM outputs,

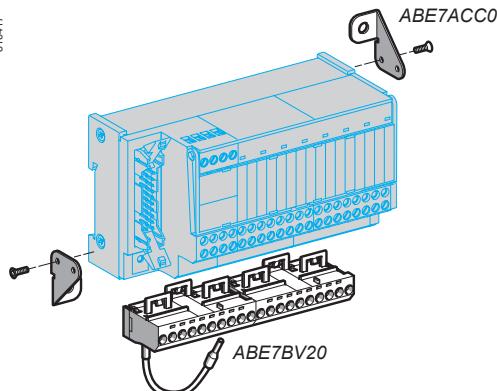

Other sub-bases enable I/O redundancy on 2 input modules in parallel (**ABE7ACC11**) or on 2 output modules in parallel (**ABE7ACC10**).

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Accessories for connection sub-bases

816417

Cabling accessories

Cable gland assembly

Using the cable gland assembly enables 3 cables to run outside the enclosure without the addition of a series connection.

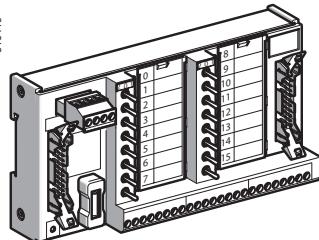

ABE7ACC01 mounting kit for solid mounting plate

This provides an alternative solution for mounting sub-bases without using an additional rail.

Additional terminal blocks ABE7BV10 and ABE7BV20

With 8 and 16 channels, these products give wider connection alternatives: common, screening, etc.

816419

ABE7TES160

Other accessories

Plug-in continuity blocks

Available in 10 and 12 mm widths, the blocks are mounted on ABE7P16T $\bullet\bullet\bullet$ relay sub-bases in place of ABR7 and ABS7 modules. They make use of the sub-base functions to connect the channel without the need to adapt the channel using a relay.

ABE7TES160 simulation sub-base

Can be used to force or inhibit the discrete I/O.

5 x 20 fuses

References for all fuses can be found under accessories.

Label marking software

This produces finished labels for channels, simplifying installation and reducing the risk of error during maintenance by marking the labels according to the sub-base mounting. The program runs under Windows.

Telefast pre-wired system with Modicon ABE 7

For 32-channel Modicon M221 Book logic controller and Modicon TM3 digital I/O expansion modules

- 1 32-channel Modicon M221 Book logic controllers (TM221M32TK, TM221ME32TK), equipped with HE 10 connectors.
- 2 Digital I/O modules (TM3D••••K) with 16 or 32 I/O, equipped with HE 10 connectors.
- 3 ABFTE20•••• cordsets with one HE 10 connector at each end.
- 4 TWDFCW•••• cordsets with an HE 10 connector at one end and flying leads at the other end for direct connections to sensors, preactuators and terminal blocks.
- 5 Optimum "miniature" sub-bases.
- 6 16-channel sub-base for expansion modules.

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Connection sub-bases for Modicon X80 I/O modules

(1) Connection of the 24 V... power supply is only possible using Modicon Telefast ABE7 sub-bases. The 0 V... connections must be equipotential.

Presentation

I/O modules on the Modicon X80 platform

- 1 Discrete input modules (BMXDDI••02K), discrete output modules (BMXDDO••02K) and discrete mixed I/O modules (BMXDDM3202K) equipped with one or two 40-way FCN connectors. The modularity of each module (••) is 32 or 64 channels.
 - 1-b Analog input or output modules:
 - Analog inputs: **BMXAMI0410** (4 channels), **BMXAMI0800** (4 channels) and **BMXAMI0810** (8 channels)
 - Analog outputs: **BMXAMO0210** (2 channels), **BMXAMO0410** (4 channels) and **BMXAMO0802** (8 channels)
 - 1-c Analog input modules **BMXART0414** (4 channels) and **BMXART0814** (8 channels)
 - 1-d HART analog I/O modules **BMEAHI0812** (8 channels) and **BMEAHO0412** (4 channels)
- 2 2 types of cordset are available depending on the type of discrete module connected to the sub-base (for combinations, see page 30). These cordsets are available in 0.5, 1, 2, 3, 5 or 10 m/1.640, 3.281, 6.562, 9.843, 16.404, 32.808 ft lengths:
 - **BMXFCC•••1** cordsets with one 20-wire sheath (AWG 22) equipped with one 40-way FCN connector and one HE 10 moulded connector on the Telefast sub-base end
 - **BMXFCC•••3** cordsets with two 20-wire sheaths (AWG 22) equipped with one common 40-way FCN connector on the module end and two HE 10 moulded connectors on the Telefast sub-base end
- 3 16-channel Modicon Telefast ABE7 Optimum or Universal passive connection sub-bases or adaptor sub-bases.
- 4 4 types of cordset are available depending on the type of analog module connected to the sub-base (for combinations, see page 31).
 - 4-b: Connection to analog module with 20-way or 28-way removable terminal block:
 - **BMXFCA••0** cordsets with a 20-way removable terminal block on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets available in 1.5 or 3m/4.92 or 9.84 ft lengths.
 - **BMXFTA••2** cordsets with a 20-way removable terminal block on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets available in 1.5 or 3m/4.92 or 9.84 ft lengths.
 - **BMXFTA••0** cordsets with a 28-way removable terminal block on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets available in 1.5 or 3m/4.92 or 9.84 ft lengths.
 - 4-c: Connection to analog module with 40-way FCN connector:
 - **BMXFCA••2** cordsets with a 40-way FCN connector on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets available in 1.5 or 3m/4.92 or 9.84 ft lengths.
 - 4-d: Connection to HART analog input module:
 - **BMXFTA1522/3022** cordsets with a 20-way removable terminal block on the module end and a 25-way SUB-D connector on the Telefast sub-base end. Cordsets available in 1.5 or 3m/4.92 or 9.84 ft lengths.
For connection to HART analog output module:
- **BMXFCA••0** (see description in section 4-b)
- 5 Modicon Telefast ABE7CPA analog and application-specific connection sub-bases (for combinations, see pages 31):
 - **ABE7CPA410** allows connection on a screw terminal block of 4 current/voltage inputs, with provision and distribution of 4 isolated power supplies for the current loop inputs
 - **ABE7CPA412** allows connection on a screw terminal block of 4 thermocouple inputs, with cold-junction compensation supplied for these inputs
 - **ABE7CPA21** allows connection on a screw terminal block of 4 current/voltage outputs
 - **ABE7CPA02** allows connection on a screw terminal block of 8 current/voltage I/O
 - **ABE7CPA03** allows connection on a screw terminal block of 8 inputs, with provision and distribution of the power supply (with limitation of each current loop) for the current/voltage outputs of the **BMXAMO0210** analog module
 - **ABE7CPA31, ABE7CPA31E** allows connection on a screw terminal block (ABE7CPA31) or a spring-type terminal block (ABE7CPA31E) of 8 inputs, with provision and distribution of the power supply (limited to 25 mA per input)
- 6 **ABE7ACC02** sub-base for splitting 16 into 2 x 8 channels, allowing connection of 8-channel sub-bases.
- 7 8-channel Modicon Telefast ABE7 Optimum or Universal passive connection sub-bases or adaptor sub-bases.

1a Discrete I/O modules with HE 10 connectors.

1b Analog I/O modules with 25-way SUB-D connectors.

1c Application-specific modules with screw terminals.

2a A single type of cable with 20-way HE 10 connectors, for 8, 12 or 16-channel modularity. The HE 10 connectors can be moulded, **TSXCDP•••** (AWG 22) or insulation piercing, **ABFH20H•••** (AWG 28).

These cordsets are available in various lengths. AWG 28 (0.08 mm²) allows input and output sub-bases rated 100 mA to be connected directly, as well as sub-bases with relays. Adaptor **ABE7ACC02** allows connection of sub-bases with 8-channel modularity.

2b All analog signals are connected with a pre-wired cable **TSXCAP030/100** with 25-way SUB-D connectors, guaranteeing shielding continuity.

2c Cable **TSXCPP••2**

3a 8-channel Modicon Telefast ABE7 sub-bases.

3b Sub-bases dedicated to counter and analog channels:

- **ABE7CPA02** for connecting current, voltage or PT100 inputs on a screw terminal block
- **ABE7CPA03** with 4-20 mA sensor loop power supply and with 25 mA/channel limiter
- **ABE7CPA21** for connecting output modules with 4 analog channels on a screw terminal block
- **ABE7CPA31** with the 4-20 mA sensor loop isolated power supply for 8 input channels isolated from one another
- **ABE7CPA11** for connecting an absolute encoder with parallel outputs
- **ABE7CPA12** for connecting 16 thermocouple probes

3c Sub-base **ABE7CPA13** dedicated to the safety channels.

4a 12 or 16-channel Modicon Telefast ABE7 sub-bases.

5a Splitter sub-bases for connecting discrete I/O in parallel from a Modicon Telefast ABE7 sub-base on 2 different PLCs:

- **ABE7ACC10** for output redundancy
- **ABE7ACC11** for input redundancy

6a Sub-base **ABE7CPA01** dedicated to connecting axis control and counter inputs on a terminal block.

(1) Connection of the 24 V ... power supply is only possible using Telefast sub-bases. The 0 V ... connections must be equipotential.

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Connection sub-bases for I/O modules for

Modicon Quantum platforms

1-2 Cabled connectors combining a standard screw terminal block, two multicore (AWG 22) cables and two 20-way HE 10 connectors. Two types of cabled connector are available:

- ABFM32H●●0 1** cabled connectors for I/O modules (32 channels) on the Modicon Quantum platform, with 2 HE 10 connectors each integrating 16 channels
- ABFM32H●●1 2** cabled connectors for I/O modules (32 channels) on the Modicon Quantum platform, with 2 HE 10 connectors each integrating 16 channels and an external power supply with a direct connection to the terminal marked (1) on the sub-bases

ABFM0●S20● cabled connectors for analog I/O modules (4, 8 or 16 channels) on the Modicon Quantum platform equipped with a standard screw terminal block and a 25-way SUB-D connector at the other end

3 Cordsets (AWG 22) equipped with a 20-way HE 10 connector **TSXCDP053/●03** for 96-channel I/O modules (connected on six 20-way HE 10 connectors)

4 **ABE7ACC02** splitter box (16 to 2 x 8 channels) for use with 8-channel sub-bases

5 A single type of cable equipped with 20-way HE 10 connectors, irrespective of the 8 or 16-channel modularity. The HE 10 connectors can be moulded **TSXCDP●●●** or insulation piercing **ABFH20H●●●**.

6 8 and 16-channel connection sub-bases from the Modicon ABE7 range

(1) The 24 V ... power supply of Quantum I/O modules must only be connected via Telefast ABE7 sub-bases. The 0 V ... connections must be equipotential.

Note: For harsh environments, **Modicon ABE9 IP67 passive splitter boxes** can be used in combination with I/O modules on the Modicon Quantum platform.

Main characteristics:

- 8/16 I/O channels
- Connection of 1 to 16 sensors/actuators
- M12 I/O connectors
- Connection to the PLC by connector or by multicore cable
- IP67 degree of protection
- Plastic case

Please consult our website www.schneider-electric.com.

(1) With the **ABE7ACC02** splitter sub-base (16 channels as 2 x 8).

(2) With **140DDI35300** module only.

(3) With **140DDI85300** module only.

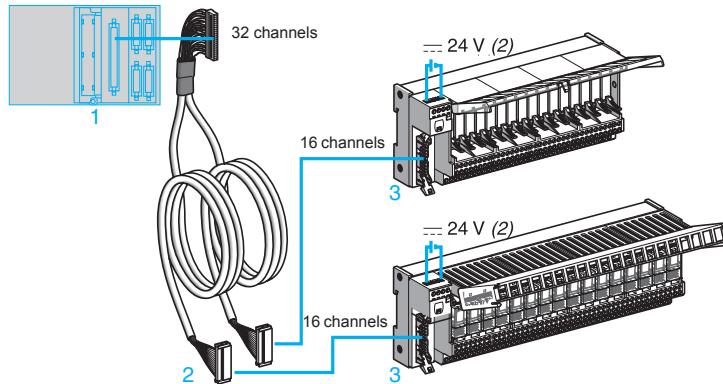

(4) 2 **ABE7CPA●●** sub-bases are required.

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

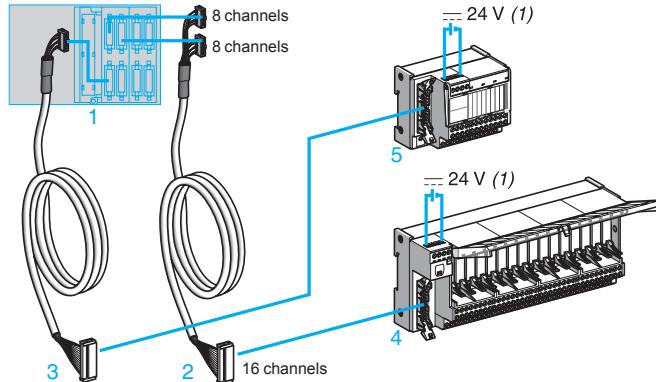

Connection sub-bases for Allen Bradley and Siemens S5 PLCs

Connection cables for Allen Bradley SLC500 PLCs

- 1 For the SLC500 range, specially designed cables connect to I/O modules which are equipped with 40-way HE 10 connectors, integrating 32 channels.
- 2 Cables ABFH40H●●● for connection of 16-channel sub-bases. These cables are pre-equipped with one 40-way HE 10 connector at the PLC end and 2 x 20-way HE 10 connectors at the Telefast end. Available in 3 metre lengths, AWG 22, there are 2 types of "Y" form cable: one exclusively for inputs and one for outputs.
- 3 16-channel sub-bases. It is possible to use 8-channel sub-bases by inserting adapter ABE7ACC02.

Connection cables for Siemens S5 PLCs

- 1 The --- 24 V power supply can be provided via 6EP5 ●●● terminal blocks connected to the PLC modules. For the 95U/100U/115U/135U/155U ranges, the cables developed connect to the manufacturer's terminal blocks with 14-way HE 10 connectors (6EP5 ●●● 1AA00). Each connector has 8 channels.
- 2 Cables ABFH28H●●● for connection of 16-channel sub-bases. These cables are pre-equipped with 2 x 14-way HE 10 connectors at the S5 PLC end and one 20-way HE 10 connector at the Telefast end. Available in 1.5 and 3 metre lengths, AWG 26, these "Y" form cables only connect the I/O controlling the relay sub-bases.
- 3 Cables ABFH14H●●● for connection of 8-channel sub-bases. These cables are pre-equipped with one 14-way HE 10 connector at the S5 PLC end and one 20-way HE 10 connector at the Telefast end. Available in 1.5 and 3 metre lengths, AWG 26, these cables are used to connect the I/O directly to the sub-bases.

(1) The --- 24 V power supply is connected using Telefast sub-bases only.
The --- 0 V connections must be equipotential.

(2) The power may be supplied via the PLC terminal block or via the Telefast sub-base.

 Pre-wired cables

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Connection sub-bases for Telemecanique TSX47 to 107, April Series 1000 PLCs

- 1 TSXBLK 81 terminal block connected to TSXDST 24 modules. Outputs are connected using a 34-way HE 10 connector, integrating all 24 channels. The $\text{---} 24\text{ V}$ power can only be supplied via the screw terminals of the terminal block.
- 2 TSXBLK 71/91 terminal blocks connected respectively to TSXDET 32●● and TSXDST 3292 modules. I/O are connected using two 20-way HE 10 connectors, each integrating 16 channels.
- 3 BF B25S●●0 cabled connector, for TSXAEM8●● analogue modules, comprising a standard TSXBLK 4 terminal block, a screened multicore cable (AWG 22) and a 25-way SUB-D connector, providing continuity of shielding. An ABFB50S●●0 cabled connector, fitted with two SUB-D connectors, enables connection to TSXAEM 160● modules.
- 4 ABFH34H●00 connection cables (AWG 28) fitted with 34-way HE 10 connectors, supplied in 1, 2 and 3 metre lengths.
- 5 ABFH20H●●1 connection cables fitted with 20-way HE 10 connectors and a rolled ribbon cable (AWG 28). These cables are used specifically to carry power supplies so that they can be connected to TSXBLK 71 and TSXBLK 91 terminal blocks. If these cables are used, it is essential that both polarities are connected to the Telefast sub-base.
- 6 ABE7ACC03 splitter sub-base enabling 24 channels to be connected to Telefast sub-bases with 8-channel modularity. In this case, it is essential to connect the $\text{---} 0\text{ V}$ to the Telefast sub-bases.
- 7 Cables TSXCDP●●● or ABFH20H●●●.
- 8 ABE7CPA02, ABE7R16S111 sub-bases with ABE7BV20 and ABE7H08R11 terminal blocks. Sub-base ABE7CPA02 enables the current, voltage or PT 100 inputs to be connected whilst maintaining continuity of shielding.

(1) The $\text{---} 24\text{ V}$ power supply is connected using Telefast sub-bases only. The $\text{---} 0\text{ V}$ connections must be equipotential.

(1) Using splitter sub-base ABE7ACC02 which allows 16 channels to be split into 2 x 8 channels.

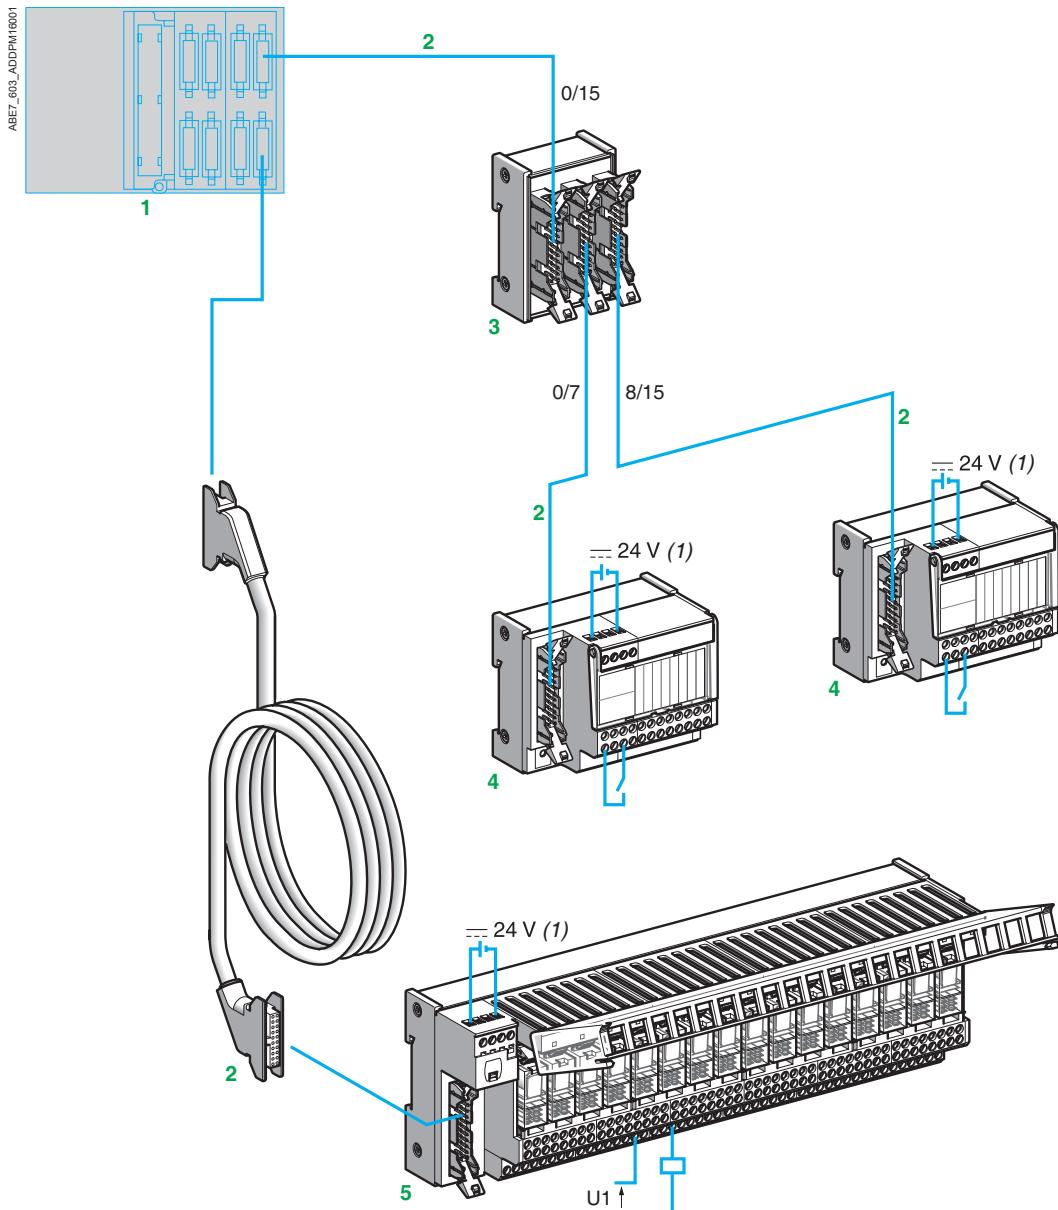

(2) Using splitter sub-base ABE7ACC03 which allows 24 channels to be split into 3 x 8 channels.

(3) With sub-base ABE7S16S2B2 only.

(4) Except DET3252.

(5) Input only.

 Pre-wired cables

- 1 I/O modules equipped with HE 10 connectors. Available in modules of 8, 12, 28 and 64 I/O.
- 2 A single type of cable equipped with 20-way HE 10 connectors, irrespective of the 8, 12 or 16-channel modularity. The HE 10 connectors may be moulded (TSXCDP●●●) or insulation piercing (ABFH20H●●●). These cables are available in 0.5 m/1.64 ft, 1 m/3.28 ft, 2 m/6.56 ft, 3 m/9.84 ft and 5 m/16.40 ft lengths. They use AWG 28 (0.08 mm²) for connection of inputs and relay sub-bases, and AWG 22 (0.324 mm²) for direct connection of the 0.5 A outputs of 8 and 28 I/O modules.
- 3 16 channels may be split into 2 x 8 channels using splitter sub-base ABE7ACC02.
- 4-5 8-channel and 16-channel sub-bases respectively.

(1) The ... 24 V power supply is connected using Telefast sub-bases only. The ... 0 V connections must be equipotential.

(5) The last four channels are not used and remain at state 1.

 Pre-wired cables

Telefast Pre-wired System

Modicon ABE7 connection sub-bases

Connection sub-bases for Twido controller

Presentation

Relay and connection functions, with or without polarity distribution, significantly reduce wiring time and eliminate the risk of error.

The Telefast pre-wired system allows fast, reliable and economical remote connection of I/O modules (--- 24 V discrete) to operative parts, partly eliminating the single-wire connection and intermediate terminal blocks.

The Telefast ABE7 system can only be connected to Twido modules equipped with HE 10 type connectors. It consists of connecting cables and interface sub-bases.

The Telefast ABE7 range is suitable for all types of connection found in control system devices:

- I/O located in the PLC cabinet,
- I/O located directly on the machine or in auxiliary enclosures.

All the I/O connection sub-bases comprise output terminals on 2 rows :

- 1st row: connection of the signal,
- 2nd row: connection of its common
- 24 V for the inputs,
- 0 V for the outputs.

A 3rd row of optional terminals ABE7BV●● may be added for connection of another common.

These I/O sub-bases are available in different configurations:

Sub-bases for Twido modular base controllers

■ **ABE7B20MPN20**: sub-base with 12 inputs + 8 passive outputs.

■ **ABE7B20MPN22**: sub-base with 12 inputs + 8 passive outputs.
 individual fuse protection for each output (0.315 A),
 LED indication,
 blade disconnector for the 0 V common.

■ **ABE7B20MRM20**: sub-base with 12 inputs + 8 outputs with soldered relays
 2 A solid state relay (1 x 4 A common/2 channels) on 2 outputs,
 electromechanical relays (1N/O --- 24 V/~ 250 V, 3 A) on 6 outputs for adaptation of the current or voltage signal (1 x 10 A common/6 channels).

Sub-bases for Twido I/O expansion modules

■ **ABE7E16EPN20**: sub-base with 16 passive inputs.

■ **ABE7E16SPN20**: sub-base with 16 passive outputs.

■ **ABE7E16SPN22**: sub-base with 16 passive outputs.
 individual fuse protection for each output (0.315 A),
 LED indication
 blade disconnector for breaking the 0 V common.

■ **ABE7E16SRM20**: sub-base with 16 soldered relay outputs
 electromechanical relays (1N/O --- 24 V/~ 250 V, 3 A) on 16 outputs for adapting the current or voltage signal (1 x 5 A common/4 channels)

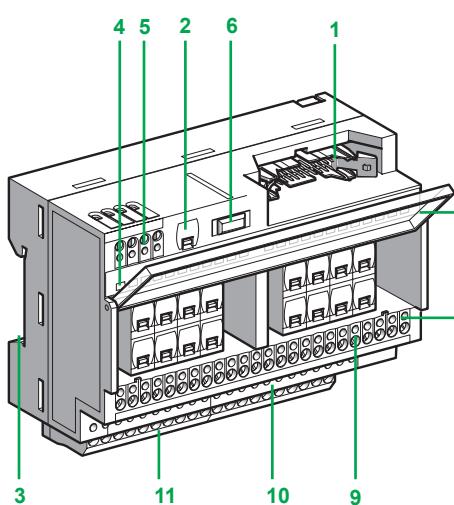

Optional terminal blocks

■ **ABE7BV20TB**

12 shunted screw terminals for the input common,
 8 shunted screw terminals for the output common.

■ **ABE7BV20**

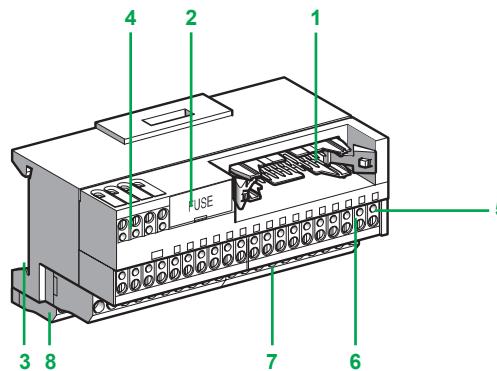

20 shunted screw terminals for connection of a single common.

Description

Connection sub-bases ABE7B20M••••, ABE7E16SRM20 and ABE7E16SPN22

- 1 HE 10 connector (20-way for ABE7E16••••, 26-way for ABE7B20•••••).
- 2 Fuse for the \approx 24 V supply circuit.
- 3 Rail mounting.
- 4 LED for channel indication (only on ABE7B20MPN22 and ABE7E16SPN22).
- 5 \approx 24 V power supply terminal block.
- 6 Blade disconnector on \approx 0 V (only on ABE7B20MPN22 and ABE7E16SPN22).
- 7 Legend holder cover: customer marking on outside and sub-base wiring scheme on inside, providing access to fuses per channel (only on ABE7B20MPN22 and ABE7E16SPN22).
- 8 Test point for Ø 2.3 mm plug.
- 9 Upper terminal block for connection of signals.
- 10 Lower terminal block for connection of commons.
- 11 Optional snap-on terminal block with 20 screw terminals.

Connection sub-bases ABE7E16EPN20 and ABE7E16SPN20

- 1 HE 10 connector, 20-way,
- 2 Fuse for the \approx 24 V supply circuit.
- 3 Rail mounting.
- 4 \approx 24 V power supply terminal block.
- 5 Test point for Ø 2.3 mm plug.
- 6 Upper terminal block for connection of signals.
- 7 Lower terminal block for connection of commons.
- 8 Optional snap-on terminal block with 20 screw terminals.

(1) 6 channels used for 8 available

(2) 6 channels used for 8 available with 2 transistor outputs and 4 relay outputs

Presentation (1)

Using the Telefast connector or adapter system rationalizes and simplifies electrical enclosure wiring.
 Far less space is required in the enclosure and the Telefast ABE7 base replaces the connection terminals at the bottom of the enclosure.

The Telefast wiring system is particularly suitable for applications requiring:

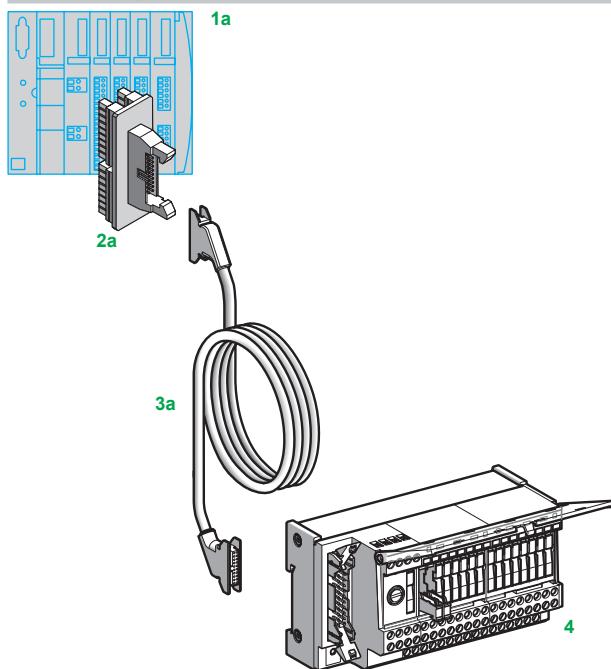

- 48 V $\perp\!\!\!\perp$ and 48 V \sim voltage I/O.
- A large number of 115 V \sim and 230 V \sim I/O.
- A large number of relay outputs.

Connection of Modicon STB I/O modules to the Telefast system differs according to the type of module:

- 16-channel digital I/O modules STBDDI3725 and STBDDO3705: Connection via Telefast HE 10 connectors and their associated Telefast ribbon cables or cables. These connection components must be ordered separately (see description below and combinations on page 59).
- Other Modicon STB digital and analog I/O modules: Connection via screw or spring-type 5/6-way removable connectors, supplied with the I/O modules and the associated pre-wired cables. The latter must be ordered separately (see below).

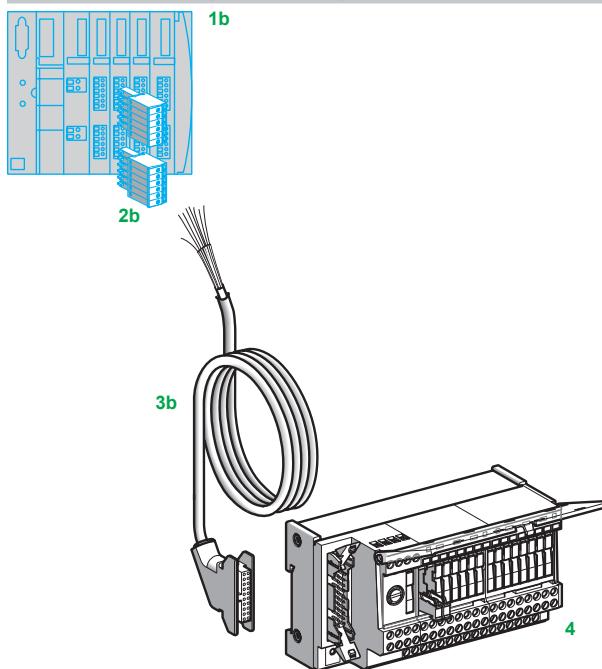

Description (1)

16-channel digital I/O modules STBDDI3725 and STBDDO3705

- 1a Modicon STB I/O island incorporating a module with 16 I/O STBDDI3725 or STBDDO3705.
- 2a HE10 connector STBXTS5•10 (DDI) or STBXTS6•90 (DDO).
- 3a Rolled ribbon cable TSXCDP•02 or connection cable TSXCDP•03 equipped with two 20-way HE10 connectors.
- 4 Modicon Telefast ABE7 connector or adapter base. See combination table on page 59.

Other Modicon STB digital and analog I/O modules

- 1b Modicon STB I/O island incorporating a digital I/O module STBDDI/DDO••••K (except for 16-channel modules) or an analog I/O module STBAVI/ACI/ART/AVO/ACO••••K.
- 2b Screw or spring-type 5/6-way removable connectors, supplied with the STB I/O module.
- 3b Pre-wired cable TSXCDP301/501/1001 (length 3/5/10 meters) with HE10 connector at one end and flying leads at the other end. Cross-section 0.324 mm², AWG24.
- 4 Modicon Telefast ABE7 connector or adapter base.

Redundancy solution for Modicon STB I/O (1)

Two Modicon STB I/O modules of the same type, located in two separate islands, can be connected to a single Telefast pre-wired base (redundancy of I/O). This configuration is used, for example, in the context of a Premium Hot Standby architecture, please refer to our "Modicon Premium automation platform" catalogue.

Digital I/O modules are connected via a Telefast redundancy base ABE7ACC11 (inputs) or ABE7ACC10 (outputs) and the same connectors and ribbon cables or cables used for single connections.

STB analog I/O modules are connected via JM Concept analog I/O multiplexers JK3000N2 (inputs) and GK3000D1 (outputs).

(1) If you require any more information on the Telefast pre-wired system, please consult our Customer Care Centre.

The STB module can provide 24 V –||| power to the Modicon ABE7 block provided the current does not exceed 50 mA per group of 4 channels. Otherwise an external power supply will be required and only the 0 V reference should be connected between the STB module and the ABE7 block.

(1) Combinations given for 16-channel Modicon STB digital I/O modules (STBDDI3725/STBDDO3705). For other Modicon STB I/O modules (1b), connectors (2b) are supplied with the modules and the connection is made via pre-wired cable TSXCDP••••• (3b). See page 58.

(2) The item numbers indicated in this table correspond to the item numbers mentioned in the description on page 58.

(3) Replace the “•” with “1” for a 1 m length, “2” for 2 m, “3” for 3 m.

(4) Replace the “••” with “05” for a 0.5 m length, “10” for 1 m, “20” for 2 m, “30” for 3 m, “50” for 5 m.

(5) Replace the “••” with “05” for a 0.5 m length, “10” for 1 m, “20” for 2 m.

(6) For complete references and descriptions, please consult our specialist catalogue “Twido programmable controller”.

(7) Empty bases.

Presentation

ABE9 passive splitter boxes for M12 connectors make it possible to eliminate long and difficult cabling operations. Due to their modularity and their dimensions, they are the ideal solution for a wide variety of customer applications.

Connection to the processing unit can either be made by connector or by multicore cable of different lengths.

IP 67 protection allows these products to be used within processes or machines in harsh environments (splashing water, oil, dust, etc.).

The splitter boxes, available in 4 or 8 channel versions, allow connection of up to 16 signals maximum, depending on the version (2 per channel).

The characteristics of splitter boxes ABE9C12 are as follows:

- Connection of sensors and actuators using M12, 5-pin connectors.
- Modularity: 4 or 8 channels.
- Fixing system and connection to the processing unit conforming to market standards:
 - fixing centres,
 - M23, 19-pin connector, enabling the use of pre-formed cables in order to reduce installation time and the risk of error,
 - multicore cable, 5 or 10 metres long. The splitter box comprises a connection cover fitted with plug-in terminals, which provides considerable flexibility for:
 - the replacement of damaged parts,
 - modification of cable length.

Base units ABE9C12••L•• enable the use of 2 separate commons which, for example, can be used for the management of an emergency stop. This function is accessible beneath the terminal cover using 2 removable links. If both links are removed, the 2 supplies become independent.

The use of a Y-connector allows 2 signals to be connected to the same M12 channel on the splitter box.

Example: splitter box ABE9C1281 (8 channels) enables the connection of 16 signals to the processing unit.

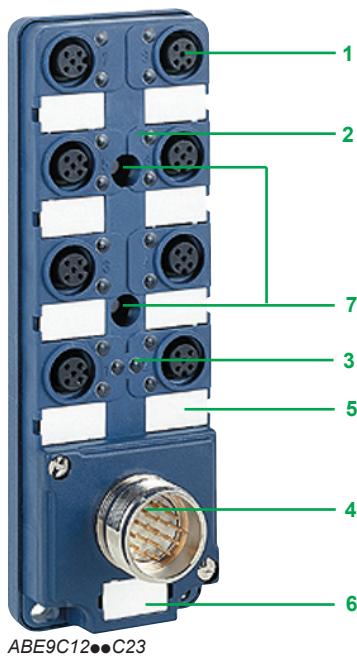

The Y-connector is available in 2 versions:

- M12-M12 for connection of two M12 connectors to a single M12 channel on the splitter box,
- M8-M12 for connection of two M8 connectors to a single M12 channel on the splitter box.

ABE9C12●●C23

Description

Passive splitter boxes ABE9C12●●C23 have the following on the front face:

- 1 Four or eight M12 female connectors (depending on model) for connection of sensors and actuators (2 channels per connector).
- 2 Eight or sixteen channel status indicator lights (depending on model).
- 3 One "Power on" indicator light on the splitter box (depending on model).
- 4 One M23, 19-pin male connector.
- 5 Four or eight channel marker labels.
- 6 One splitter box marker label.
- 7 Splitter box fixing holes.

ABE9C12●●L●●

Passive splitter boxes ABE9C12●●L●● have the following on the front face:

- 1 Four or eight M12 female connectors (depending on model) for connection of sensors and actuators (2 channels per connector).
- 2 Eight or sixteen channel status indicator lights (depending on model).
- 3 Two "Power on" indicator lights on the splitter box (depending on model).
- 4 One removable connection cover fitted with plug-in terminals.
- 5 Four or eight channel marker labels.
- 6 One splitter box marker label.
- 7 Splitter box fixing holes.
